

# IFCSUM Forwarding and Consolidation Summary Message

## Introduction:

A message to be used for consolidation purposes from a party arranging forwarding and transport services to the party for which the transport of the consolidated cargo is destined. The message can be used to exchange information concerning the consolidated cargo between forwarders, carriers and agents enabling those parties to handle the consignments included in this consolidation. In addition it can be used for a collection of consignments originating from one shipper for forwarding and transport services. In addition it can be used for an advice of insurance related to a consolidation of consignments if the insured is the party arranging forwarding and transport services.

## Notes:

This guideline is a joint development between the Portuguese Port Authorities and Portuguese Customs. The focus is the cargo manifest message, named ManifDat.

In general, the goal is to provide the definition of the IFCSUM Message Implementation Guideline (MIG) for the transmission to the Port Authorities system of the IFCSUM messages. This definition must be compatible with the data set and rules required by Portuguese Customs in the context of the SiMTeM project - Sistema Integrado de Meio de Transporte e Mercadorias, applied to maritime transport.

In this frame, the messages must comply with Customs MaritimeManifestInformation message (MMI). This guarantees that all elements for the MMI message are present (even if some syntax translation is required), and also includes elements for Port Authority.

This guideline was elaborated considering the following references:

- UN/EDIFACT D.22B IFCSUM
- UN/EDIFACT D.22B Data Element Code Lists or newer when adequate
- ISO 6346 - Freight containers - Coding, identification and marking
- UN/ECE Recommendation N.º 1 - United Nations Layout Key for Trade Documents (Doc. Ref. ECE/TRADE/137)
- UN/ECE Informative Annex to Recommendation N.º 1 - United Nations Layout Key for Trade Documents (Doc. Ref. ECE/TRADE/270)
- UN/ECE Recommendation N.º 7 - Numerical Representation of Dates, Time and Periods of Time (Doc. Ref. TRADE/CEFACT/2001/19)
- UN/ECE Recommendation N.º 16 - UN/LOCODE - Codes for Ports and Other Locations (Doc. Ref. ECE/TRADE/227) upgraded to 2003.2 version
- UN/ECE Recommendation N.º 19 - Codes for Modes of Transport (Doc. Ref. TRADE/CEFACT/2001/19)
- UN/ECE Recommendation N.º 20 - Codes for Units of Measure Used in International Trade (Doc. Ref. TRADE/CEFACT/2001/20)
- UN/ECE Recommendation N.º 21 - Codes for Types of Cargo, Packages and Packaging Materials Revision 2 (Doc. Ref. ECE/TRADE/211)
- UN/ECE Recommendation N.º 21 - Codes for Types of Cargo, Packages and Packaging Materials Revision 4 to Annex V and Annex VI (Doc. Ref. TRADE/CEFACT/2002/)
- ITIGG: General Recommendations Version 2.1 March 2001 (Doc. Ref. 4/ITIGG/104/v.2.00)
- ITIGG: IFCSUM Principles and Rules for Implementation of Consignment Based Messages (Doc. Ref. D4/ITIGG/100/v2.9)
- SiMTeM - Via Marítima - MensagensExternas\_Operadores, v1.7, from Portuguese Customs.

The exchange process of this message is similar to the one implemented in Portugal between Shipping Agents/Economic Operators to Port Authorities systems and Customs SDS platform, since 2007. To recall:

- Shipping Agent/Economic Operator sends IFCSUM message to Port Authority.
- Port Authority validates and sends a CUSRES to Shipping Agent/Economic Operator.
- If the validation was successful then a MMI message is sent to Customs system.
- Customs validates and sends a MMR - MaritimeManifestResponse message (defined in another message implementation guideline) to the Port Authority system.
- Port Authority incorporates the message, and generates CUSRES to the Shipping Agents/Economic Operator passing Customs validation results.

In the context JUL and SiMTeM, the interpretation of the IFCSUM message is focused on the transport documents present in the message and not on the manifest itself. The manifest continues to have its own characteristics and properties. However its role as a full document is not applicable anymore. Now the role is to aggregate documents related with a vessel call and Customs vessel call id (Contramarca), by movement type (loading, discharge, transit on board). This brings granularity to the way the message is used and its different process stages. This change has two major consequences.

One is that some more entities are declared in the transport documents since a check against the header part of the document is very limited.

The other is with the usage of IFCSUM message itself. Instead of having the functions (in BGM segment as explain in the this segment notes) Original, Addition, Deletion, Change and Cancellation, only Original, Change and Cancellation are available. Functions Original and Cancellation keep their usual interpretation, but function Change will include a larger applicability since will include addition of new transport, deletion and changes to previously sent transport documents. Which situation is applied to each transport document is declared in the transport document itself, in a data element marked for this usage. This may allow an easier management of the message building because if additions, deletions or changes are made by the Shipping Agent/Economic Operator during the same user session, only one message needs to be send with the final result of the action, instead one message by each operation (add, delete, change) done.

Another change is that explicit need to express the finalization of the manifest is not to be done. Once a transport document is sent, it is available for complete evaluation independently of further changes it may have.

The need for Customs to send several response messages related with the same manifest message remains.

Notes to date/time elements. In JUL (Port Authorities system) and SiMTeM (Customs system) databases, date and time information are saved in UTC. For this reason, and because each IFCSUM message may be generated in different timezones, timezone information must be present in all date/time elements. See the examples in DTM segments.

Notes on entities data. Entities are identified by two alternative ways. A short form by providing the EORI number of the entity. This number is provided by any EU Customs Office upon request. The long form is by providing an identification number (if exists) given by a competent authority of a non-EU country recognized by the EU, the name and additional data of the location. The usage attribute and notes in segment NAD clarify. However, due to legislation, some type of entities need to have an EORI identifier. In these cases it should be provided.

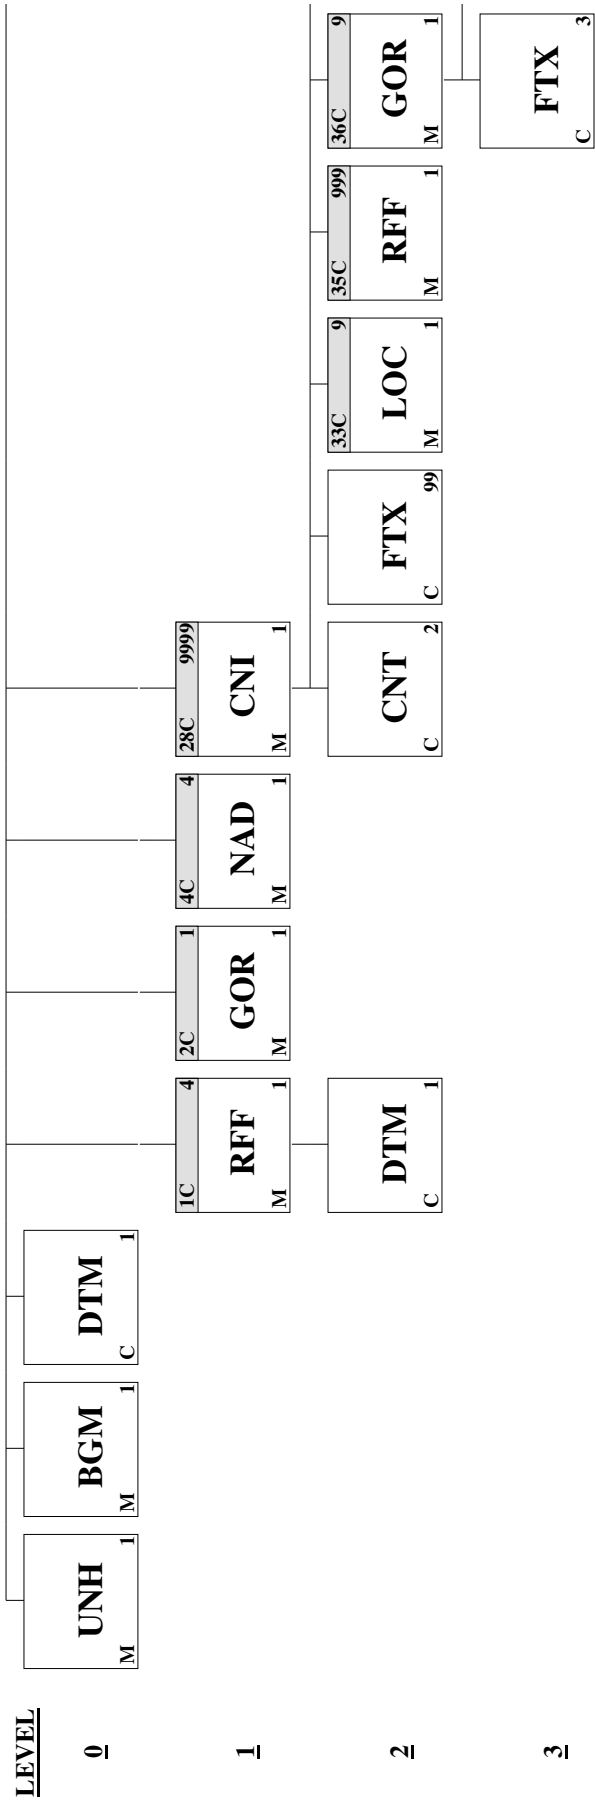

Note on transport document unfolding process. In this context unfolding a document is the action that allows a Shipping Agent/Economic Operator to provide more detail data of a transport document, by segregating the document into other documents that are portions of the first, simultaneously keeping the segregated access to the detailed data. This action must obey to the following rules. One is that goods items or transport equipment in the one or more resulting documents, must be mentioned in the unfolded document, and the total quantities in the resulting documents must be equal to the quantity of the same nature in the unfolded document. The other rule is all resulting documents of an unfolding process must be present in the same message.

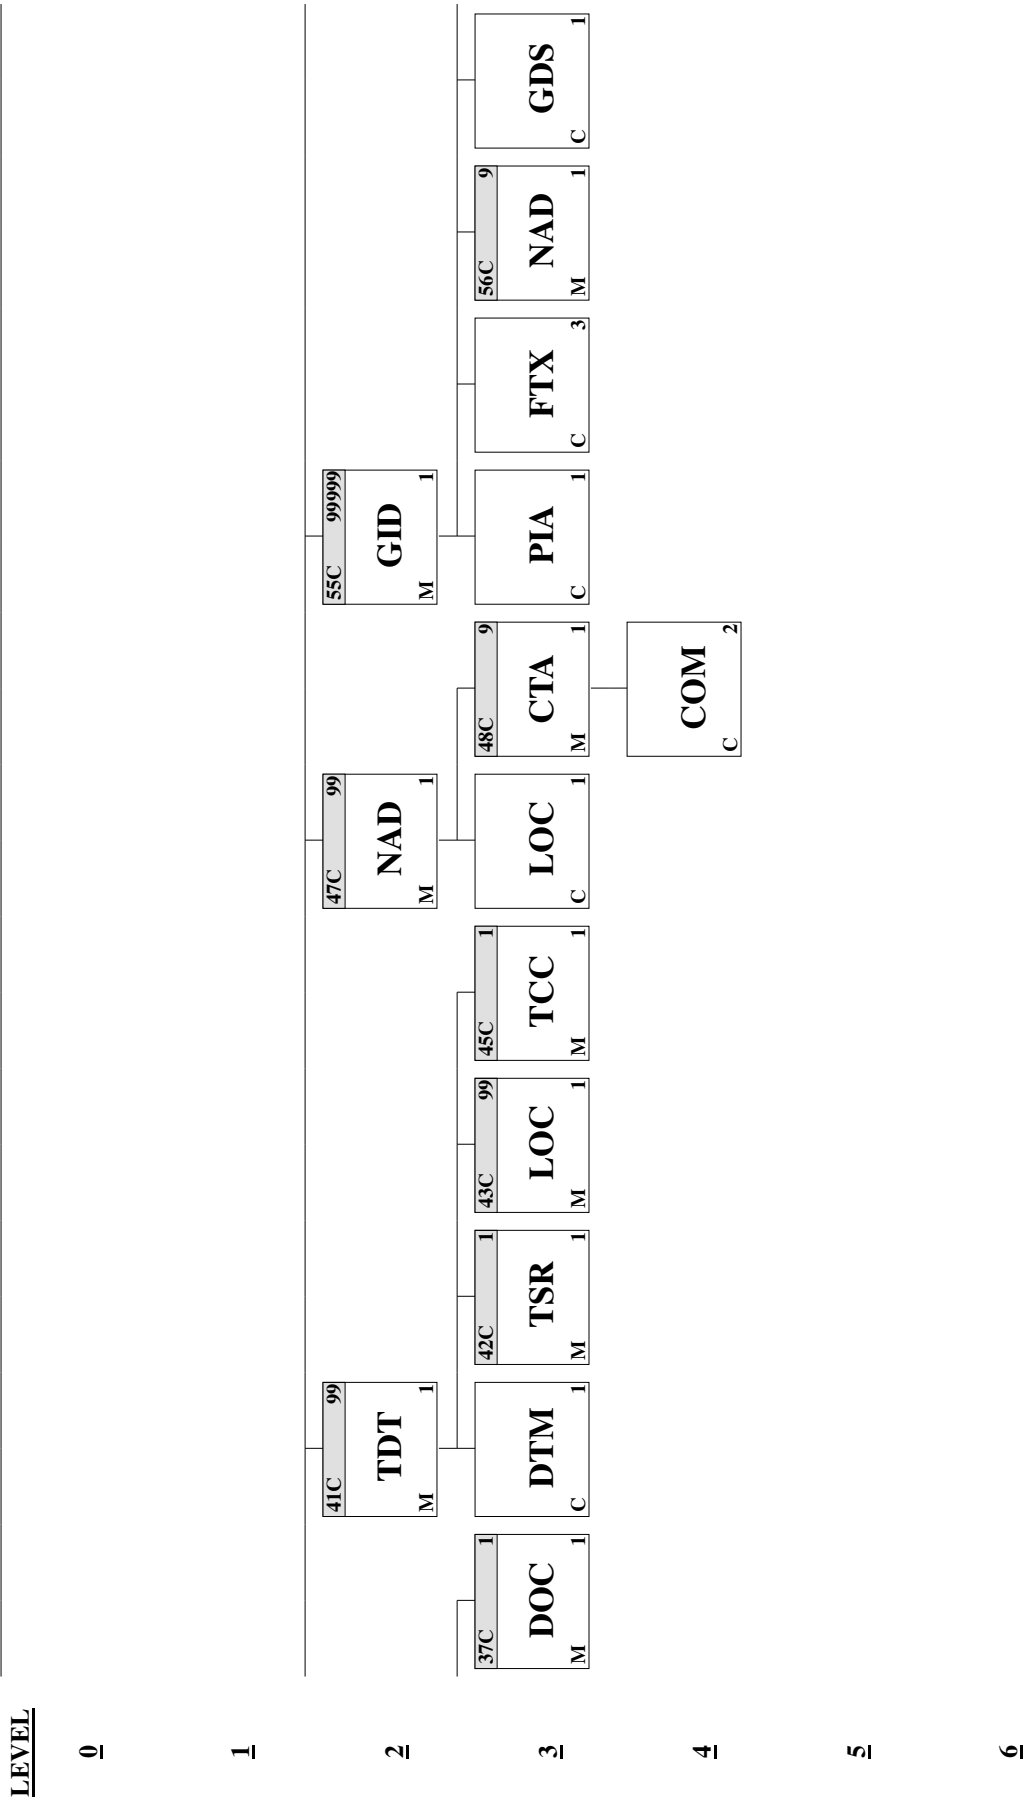

Usage indicators in this document follow ITIGG Recommendation D4/G44.

Comments:			
Notes:	Example: Message envelope number 9246801357, type IFCSUM, draft version/UN/Edifact Directory D.22B  UNH+9246801357+IFCSUM:D:22B:UN'		

Data Element Summary				
Data Element	Component Element	Name	Base Attributes	User Attributes
0062		MESSAGE REFERENCE NUMBER Unique message reference assigned by the sender.	M 1 an..14	M
S009		MESSAGE IDENTIFIER Identification of the type, version etc. of the message being interchanged.	M 1	M
	0065	Message type identifier Code identifying a type of message and assigned by its controlling agency. IFCSUM Forwarding and consolidation summary message A code to identify the forwarding and consolidation summary message.	M an..6	M
	0052	Message type version number Version number of a message type. D Draft version/UN/EDIFACT Directory Message approved and issued as a draft message (Valid for directories published after March 1993 and prior to March 1997). Message approved as a standard message (Valid for directories published after March 1997).	M an..3	M
	0054	Message type release number Release number within the current message type version number (0052). 22B	M an..3	M
	0051	Controlling agency Code identifying the agency controlling the specification, maintenance and publication of the message type. UN UN/CEFACT United Nations Centre for Trade Facilitation and Electronic Business (UN/CEFACT).	M an..2	M

<b>0057</b>	<b>Association assigned code</b>	<b>C</b>	<b>an..6</b>	<b>O</b>
	Code, assigned by the association responsible for the design and maintenance of the message type concerned, which further identifies the message.			
<b>0068</b>	<b>COMMON ACCESS REFERENCE</b>	<b>C</b>	<b>1 an..35</b>	<b>O</b>
	Reference serving as a key to relate all subsequent transfers of data to the same business case or file.			
<b>S010</b>	<b>STATUS OF THE TRANSFER</b>	<b>C</b>	<b>1</b>	<b>O</b>
	Statement that the message is one in a sequence of transfers relating to the same topic.			
<b>0070</b>	<b>Sequence message transfer number</b>	<b>M</b>	<b>n..2</b>	<b>M</b>
	Number assigned by the sender indicating that the message is an addition or change of a previously sent message relating to the same topic.			
<b>0073</b>	<b>First/last sequence message transfer indication</b>	<b>C</b>	<b>a1</b>	<b>O</b>
	Indication used for the first and last message in a sequence of the same type of message relating to the same topic.			
	Refer to D.22B Data Element Dictionary for acceptable code values.			

<b>Segment:</b>	<b>BGM</b> Beginning of Message
<b>Position:</b>	00020
<b>Group:</b>	
<b>Level:</b>	0
<b>Usage:</b>	Mandatory
<b>Max Use:</b>	1
<b>Purpose:</b>	A segment to indicate the beginning of the message and to transmit identifying number (e.g. Master B/L, Master AWB etc.), type, date and the function of the message.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<p>As explained in the introductory notes, the usage of the message function code element is limited to three possibilities.</p> <p>If the value is 9 (Original) then the message is the first of a chain of messages (even if no more messages are sent) related with the same vessel call and movement type (import, export, transit on board). This does not mean that all transport documents applicable are present. As a consequence, all transport documents are new.</p> <p>If the value is 4 (Change) then the message is other than the first message of the chain and it is updating the set of transport documents. This action can be the addition of new documents to the set, changes of existing documents, or removal of previous sent documents. What it is applicable to each transport document is signaled in a data element for the purpose.</p> <p>If the value is 1 (Cancellation) then the message must be the last of the chain and implies the removal of all transport documents previous sent regardless when they were submitted. In this case there is no need to send data of the transport documents (segment group 28).</p> <p>Example: Message number 45192399 refering a cargo manifest/set of transport documents updating information related with a previous message</p> <p>BGM+785+45192399+4'</p>

Data Element Summary				
<u>Data Element</u>	<u>Component Element</u>	<u>Name</u>	<u>Base Attributes</u>	<u>User Attributes</u>
C002		DOCUMENT/MESSAGE NAME	C 1	R
		Identification of a type of document/message by code or name. Code preferred.		
	1001	Document name code	C an..3	R
		Code specifying the document name.		
		785 Cargo manifest		
		Listing of goods comprising the cargo carried in a means of transport or in a transport-unit. The cargo manifest gives the commercial particulars of the goods, such as transport document numbers, consignors, consignees, shipping marks, number and kind of packages and descriptions and quantities of the goods.		
	1131	Code list identification code	C an..17	X

	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
	<b>1000</b>	<b>Document name</b>	<b>C</b>	<b>an..35</b>	<b>X</b>
<b>C106</b>		<b>DOCUMENT/MESSAGE IDENTIFICATION</b>	<b>C</b>	<b>1</b>	<b>R</b>
		Identification of a document/message by its number and eventually its version or revision.			
	<b>1004</b>	<b>Document identifier</b>	<b>C</b>	<b>an..70</b>	<b>R</b>
		To identify a document.			
		Provides the identification of the message.			
	<b>1056</b>	<b>Version identifier</b>	<b>C</b>	<b>an..9</b>	<b>X</b>
	<b>1060</b>	<b>Revision identifier</b>	<b>C</b>	<b>an..6</b>	<b>X</b>
<b>1225</b>		<b>MESSAGE FUNCTION CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>R</b>
		Code indicating the function of the message.			
	<b>1</b>	Cancellation			
		Message cancelling a previous transmission for a given transaction.			
		Cancel all the already sent transport documents of a manifest (in the Customs system) and the manifest itself (in the Port Authority system). This cannot occur in the following situations:			
		a) at least one of the transport documents is in the state of closed by the Port Authority, since it was already subject to invoicing and statistical valuation;			
		b) at least one transport equipment or one goods item referred in one of the transport documents had a physical movement.			
		This applies to the transport documents of the carrier identified in group 4 (NAD).			
		Group 28 (CNI) is not needed to be send in this context.			
	<b>4</b>	Change			
		Message containing items to be changed.			
		Use this function when it is not the first message of the manifest and a cancellation is not being requested. The complementary information describing the action applicable to each transport document is provided in group 28 (CNI), segment FTX, element 4441 having element 4445 with qualifier BAR.			
		This will allow to identify which transport documents are being added (create), changed (update) or removed (annul) in the message with this function.			
	<b>9</b>	Original			
		Initial transmission related to a given transaction.			
		Use this function on the issue of the first message of a manifest, providing a first set of transport documents.			
<b>4343</b>		<b>RESPONSE TYPE CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>
<b>1373</b>		<b>DOCUMENT STATUS CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>
<b>3453</b>		<b>LANGUAGE NAME CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>

<b>Segment:</b>	<b>DTM</b> Date/Time/Period
<b>Position:</b>	00030
<b>Group:</b>	
<b>Level:</b>	0
<b>Usage:</b>	Conditional (Required)
<b>Max Use:</b>	1
<b>Purpose:</b>	A segment to specify date/time of the document/message.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<div>The usage is to provide the date/time of the message generation.  Regard that timezone to the east of UTC should include the adopted EDIFACT escape character (?) in the value because of the presence of the plus (+) sign. This is also applicable during summer time when daylight saving time shift is applicable.  Example: The message was issued on 2022/10/09 at 14:30:21, Athens time  DTM+182:20221009143021?+0200:208'  Example: The message was issued on 2022/11/21 at 10:32:51, Buenos Aires time  DTM+182:20221121103251-0300:208'</div>

Data Element Summary				
Data Element	Component Element	Name	Base Attributes	User Attributes
C507		DATE/TIME/PERIOD	M 1	M
		Date and/or time, or period relevant to the specified date/time/period type.		
	2005	Date or time or period function code qualifier	M an..3	M
		Code qualifying the function of a date, time or period.		
		182 Issue date		
		Date when a document/message has been or will be issued.		
	2380	Date or time or period text	C an..35	R
		The value of a date, a date and time, a time or of a period in a specified representation.		
		According with UN/ECE Recommendation N.º 7.		
	2379	Date or time or period format code	C an..3	R
		Code specifying the representation of a date, time or period.		
		208 CCYYMMDDHHMMSSZHHMM		
Calendar date including time with seconds, with Time Zone: C = Century, Y = Year; M = Month; D = Day; H = Hour; M = Minute, S = Seconds, Z = leading plus/minus sign, HHMM = difference to UTC in Hours and Minutes.				

<b>Group:</b>	<b>RFF</b> Segment Group 1: Reference
<b>Position:</b>	00090
<b>Group:</b>	
<b>Level:</b>	1
<b>Usage:</b>	Conditional (Required)
<b>Max Use:</b>	4
<b>Purpose:</b>	A group of segments containing references and constants which apply to the entire message.
<b>Notes:</b>	<p>This group is used to send the four possible references allowed at header level:</p> <ul style="list-style-type: none"> <li>- Port Authority vessel call id</li> <li>- Customs vessel call id (known as "Contramarca")</li> <li>- Manifest id provided by the carrier/agent</li> <li>- Reference to a previous message</li> </ul> <p>This group must be send the number of times needed to send all the references that the carrier/agent is aware at the moment the document is send. At least the manifest id and Port Authority vessel call id must be present. So the group must occur twice, at least.</p> <p>The Customs vessel call id is sent when known. In case the shipping agent hasn't provided this reference, the Port Authority will include it in the message send to Customs.</p> <p>The reference to a previous message is only sent when the message function stated in data element BGM:1225, is not 9. The goal behind this usage is to provide a way to keep the correct chronological sequence of different messages related with the same document synchronized with the sender. This usage is based on ITIGG Recommendation D4/G4.</p> <p>When qualifiers ACW or AFB are used in element RFF:1153 then segment DTM in this group must be sent.</p> <p>For qualifier ACW the date in segment DTM should be the one that was present in segment DTM at top level of the previous message.</p> <p>For qualifier AFB the date in segment DTM corresponds to the date of manifest. It is admissible this date to be the same as the date in segment DTM at top level, but cannot be posterior, after discounting timezone shift.</p> <p>The manifest id provided by the carrier/agent and respective date, must be unchangeable and unique for each carrier/agent, independently of the number of messages associated with the manifest.</p>

## Segment Summary

	<b>Pos.</b>	<b>Seg.</b>		<b>Req.</b>	<b>Max.</b>	<b>Group:</b>
	<b>No.</b>	<b>ID</b>	<b>Name</b>	<b>Des.</b>	<b>Use</b>	<b>Repeat</b>

<b>Segment:</b>	<b>RFF</b> Reference
<b>Position:</b>	00100 (Trigger Segment)
<b>Group:</b>	SG1
<b>Level:</b>	1
<b>Usage:</b>	Mandatory
<b>Max Use:</b>	1
<b>Purpose:</b>	A segment to express a reference which applies to the entire message.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<div>When the reference is Customs vessel call id (DE:1153=AFM) then the reference value in DE:1154 must have the format defined by Customs. The current format is<ul style="list-style-type: none"><li>- Customs office code: 3 digits</li><li>- Mode of transport code (based on UN/CEFACT Trade Facilitaion Recommendation N.º 19 - Code for Modes of Transport): 1 digit</li><li>- Year: 4 digits</li><li>- Sequential number: 6 digits left padded with zeros</li></ul>Example: Vessel call at Lisbon identified by PTLIS122001122 RFF+ATZ:PTLIS122001122' Example: Customs vessel call id ("Contramarca") in Viana do Castelo 75012022000198 RFF+AFM:75012022000198' Example: Manifest id given by carrier/agent is NBAVAD001 RFF+AFB:NBAVAD001' Example: Previous message related with the manifest is identified by 6352145JK65 RFF+ACW:6352145JK65'</div>

Data Element Summary				
<u>Data Element</u>	<u>Component Element</u>	<u>Name</u>	<u>Base Attributes</u>	<u>User Attributes</u>
C506		REFERENCE	M	1
		Identification of a reference.		
	1153	Reference code qualifier	M	an..3
		Code qualifying a reference.		
		ACW		Reference number to previous message
				Reference number assigned to the message which was previously issued (e.g. in the case of a cancellation, the primary reference of the message to be cancelled will be quoted in this element).
				The reference is the id that appeared in BGM:C106:1004 of the latest previous message of this same manifest. Used when BGM:1225 in {1,4}.
		AFB		Cargo manifest number

		[1037] Reference number assigned to a cargo manifest.		
		The reference by which the carrier/agent knows the manifest.		
ANK		Reference number assigned by third party		
		Reference number assigned by a third party.		
		The reference is the Customs vessel call id (known as Contramarca).		
ATZ		Ship's stay reference number		
		(1099) Reference number assigned by a port authority to the stay of a vessel in the port.		
		The reference is the Port Authority vessel call id. The number is provided by the Port Authority system when the vessel call is declared/opened.		
1154	Reference identifier	C	an..70	R
		Identifies a reference.		
1156	Document line identifier	C	an..6	X
1056	Version identifier	C	an..9	X
1060	Revision identifier	C	an..6	X

**Segment:** **DTM** Date/Time/Period  
**Position:** 00110  
**Group:** SG1  
**Level:** 2  
**Usage:** Conditional (Dependent)  
**Max Use:** 1  
**Purpose:** A segment to indicate date and time relating to the reference.

**Dependency Notes:**

**Semantic Notes:**

**Comments:**

**Notes:** The complete meaning of this date depends of the reference type in the previous segment RFF, stated in element RFF:1153. This segment must be sent when RFF:1153 is in {ACW, AFB}. Otherwise it will be ignored.

Regard that timezone to the east of UTC should include the adopted EDIFACT escape character (?) in the value because of the presence of the plus (+) sign. This is also applicable during summer time when daylight saving time shift is applicable.

Note that the date/time shall be adjusted with the timezone offset applied to the system issuing the message (IFCSUM) and not the offset provided by the system that initially provided the reference, regardless it could be the same.

Example: Date/time of the reference is 2022/09/10 11:31:47, Lisbon winter time  
DTM+171:20220910113147?+0000:208'

**Data Element Summary**

<b>Data</b>	<b>Component</b>		<b>Base</b>	<b>User</b>
<b><u>Element</u></b>	<b><u>Element</u></b>	<b><u>Name</u></b>	<b><u>Attributes</u></b>	<b><u>Attributes</u></b>
<b>C507</b>		<b>DATE/TIME/PERIOD</b>	<b>M 1</b>	<b>M</b>
		Date and/or time, or period relevant to the specified date/time/period type.		
	<b>2005</b>	<b>Date or time or period function code qualifier</b>	<b>M an..3</b>	<b>M</b>
		Code qualifying the function of a date, time or period.		
		171 Reference date/time		
		Date/time on which the reference was issued.		
	<b>2380</b>	<b>Date or time or period text</b>	<b>C an..35</b>	<b>R</b>
		The value of a date, a date and time, a time or of a period in a specified representation.		
		According with UN/ECE Recommendation N.º 7.		
	<b>2379</b>	<b>Date or time or period format code</b>	<b>C an..3</b>	<b>R</b>
		Code specifying the representation of a date, time or period.		
		208 CCYYMMDDHHMMSSZHHMM		
		Calendar date including time with seconds, with Time Zone: C = Century, Y = Year; M = Month; D = Day; H = Hour; M = Minute, S = Seconds, Z = leading plus/minus sign, HHMM = difference to UTC in Hours and Minutes.		

<b>Group:</b>	<b>GOR</b> Segment Group 2: Governmental Requirements
<b>Position:</b>	00120
<b>Group:</b>	
<b>Level:</b>	1
<b>Usage:</b>	Conditional (Required)
<b>Max Use:</b>	1
<b>Purpose:</b>	A group of segments to give information about the current customs procedure under which the transport is moving or to indicate applicable governmental procedures related to import, export and transit of the voyage/flight or consolidation.
<b>Notes:</b>	<p>This group is to state the movement type (Load, Unload, Transit) of the transport documents present in the message. This means that all transport documents included in the message must be of the same movement type (import, export, transit on board).</p> <p>Its usage replaces the need to use different codes in BGM:1001.</p>

**Group:** **NAD** Segment Group 4: Name and Address

**Position:** 00210

**Group:**

**Level:** 1

**Usage:** Conditional (Required)

**Max Use:** 4

**Purpose:** A group of segments to identify a party and related contacts and references.

**Notes:** This group identifies the parties involved in the message interchanged. They are the sender (MS), the receiver (MR), the declarant (AE) of the data in the message, and the Carrier (CA) that should be the same for all transport documents included in the message.

In the communication between the Shipping Agents/Economic Operators and Port Authorities, the message receiver (MR) is the Port Authority.

All parties must be identified only by its EORI number.

The inclusion of the message sender (NAD:3035=MS) and the message receiver (NAD:3035=MR) is to separate the business level from the technical issues. For instance, allow that the entity that is sending the document can be different from the one which is the originator of the document. The same applies to the receiver versus the destination.

Segment Summary

	Pos.	Seg.		Req.	Max.	Group:
	<u>No.</u>	<u>ID</u>	<u>Name</u>	<u>Des.</u>	<u>Use</u>	<u>Repeat</u>
M	00220	NAD	Name and Address	M	1	

<b>Segment:</b>	<b>NAD</b> Name and Address
<b>Position:</b>	00220 (Trigger Segment)
<b>Group:</b>	SG4
<b>Level:</b>	1
<b>Usage:</b>	Mandatory
<b>Max Use:</b>	1
<b>Purpose:</b>	A segment to identify the party's name, address and function.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<p>Entities can be identified by two alternative ways.</p> <p>The short form requires only the usage of element C082 to provide entity's EORI number. The long form implies the usage of elements C082 if an identification of the entity was provided by a competent authority of a non-EU country recognized by the EU, C080, C059, 3164, C819, 3251 and 3207 according to the usage attributes.</p> <p>However all entities mentioned at this point of the message, must be identified using only the short form.</p> <p>Example: The declarant of the data in this message is identified by the EORI PT502154368</p> <p>NAD+AE+PT502154368'</p> <p>Example: The carrier is NV BOECKMAMS SHIPPING, from Antwerpen, Belgium, with office at Binnenvaartstraat, number 85, postal code 2000, having EORI BE0406308056</p> <p>NAD+CA+BE0406308056'</p>

Data Element Summary				
<u>Data Element</u>	<u>Component Element</u>	<u>Name</u>	<u>Base Attributes</u>	<u>User Attributes</u>
3035		PARTY FUNCTION CODE QUALIFIER	M 1 an..3	M
		Code giving specific meaning to a party.		
	AE	Declarant's agent/representative		
		Any natural or legal person who makes a declaration to an official body on behalf of another natural or legal person, where legally permitted (CCC).		
		If this qualifier is used then elements C080, C059, 3164, C819, 3251 and 3207 are not needed.		
	CA	Carrier		
		[3126] Party undertaking or arranging transport of goods between named points.		
	MR	Message recipient		
		A party to receive a message or messages.		
		If this qualifier is used then elements C080, C059, 3164, C819, 3251 and 3207 are not needed.		
	MS	Document/message issuer/sender		

[3522] Issuer of a document and/or sender of a message.

If this qualifier is used then elements C080, C059, 3164, C819, 3251 and 3207 are not needed.

<b>C082</b>	<b>PARTY IDENTIFICATION DETAILS</b>	<b>C</b>	<b>1</b>	<b>R</b>
	Identification of a transaction party by code.			
<b>3039</b>	<b>Party identifier</b>	<b>M</b>	<b>an..35</b>	<b>M</b>
	Code specifying the identity of a party.			
	EORI number of the entity previously issued by a EU Customs Office.			
<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>

<b>3251</b>	<b>POSTAL IDENTIFICATION CODE</b>	<b>C</b>	<b>1 an..17</b>	<b>X</b>
<b>3207</b>	<b>COUNTRY IDENTIFIER</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>

<b>Group:</b>	<b>CNI</b> Segment Group 28: Consignment Information
<b>Position:</b>	01240
<b>Group:</b>	
<b>Level:</b>	1
<b>Usage:</b>	Conditional (Dependent)
<b>Max Use:</b>	9999
<b>Purpose:</b>	<p>A segment group to give information about all consignments included in a voyage/flight or consolidation. The segment group can be used in two different manners to serve different approaches to consolidate messages:</p> <ul style="list-style-type: none"> <li>- Short form consolidation message</li> </ul> <p>In this situation, single consignment based functional messages (e.g. booking and/or instruction messages) have been sent on a progressive basis between exchanging partners (e.g. freight forwarder on the export side to freight forwarder on the import side). When the loading of the vessel/aircraft or consolidation is complete the IFCSUM-message will be sent and will use the CNI- segments to identify the transport document/message number (e.g. bill of lading, air-way bill, etc.) of every consignment, the details of which have already been sent as separate single consignment based messages (e.g. booking and/or instruction messages) or which will be sent as separate single consignment based messages following the IFCSUM-message using the option of grouping with the UNG-service-segment in a transmission. When the carrier himself loads consignments in a container or ULD the segment SGP and/or TPL following the CNI can be used to indicate in which equipment specified in the EQD-group on top level and/or which means of transport specified in the TDT-group on top level the consignment is loaded.</p> <p>Thus the short form IFCSUM-message operates as a reconciliation and control statement.</p> <ul style="list-style-type: none"> <li>- Extended form consolidation message</li> </ul> <p>In this situation, the data for each individual consignment has NOT been sent to the receiving partner by means of single consignment based messages (e.g. booking and/or instruction messages) separate to the IFCSUM message. In these circumstances it is possible to include the details of each consignment into the IFCSUM-message. In that case the segment (group) SGP and TPL following the segment CNI will not be used. For every consignment the complete structure of a single consignment based message can be used starting with the segment CNI replacing the BGM.</p> <p>Thus the extended form IFCSUM-message has not the function of referencing but to show as full a set of consignment data as is necessary to meet the requirements of type of consolidation message being constructed, e.g. Cargo vs. Full Freight.</p>
<b>Notes:</b>	<p>This group is to provide data related with the transport documents under which the cargo is being transported into/from the port.</p> <p>See notes in element BGM:1225 to see when this group has to be send.</p> <p>The group allows the addition, updating and removal of transport documents from the set of documents that constitute the manifest. However there is no need to segregate these purposes in several messages. Except for the first message, with the original function, where all documents are added (since they are new), in the other further messages, with the change function, a mix of purposes can be send simultaneously.</p> <p>The reason of the presence of the transport document in a message is stated in element SG28:FTX:4441, having SG28:FTX:4451 the value BAR.</p>

Due to syntax limitations, if more than 9999 must be reported then send the original message (BGM:1225=9) and change messages (BGM:1225=4) with the purpose having the addition value.

Somehow the transport document must be identified clearly. This implies that unique keys must exist. Being aware that there isn't an "universal" numbering system that would prevent different documents of having the same identification, the identification key is based on the Local Reference Number (see segment CNI notes).

### Segment Summary

	<b>Pos.</b>	<b>Seg.</b>		<b>Req.</b>	<b>Max.</b>	<b>Group:</b>
	<b><u>No.</u></b>	<b><u>ID</u></b>	<b><u>Name</u></b>	<b><u>Des.</u></b>	<b><u>Use</u></b>	<b><u>Repeat</u></b>

Segment:	<b>CNI</b> Consignment Information
Position:	01250 (Trigger Segment)
Group:	SG28
Level:	1
Usage:	Mandatory
Max Use:	1
Purpose:	A segment to indicate consignments included in the consolidation using the transport document/message number or to replace the segment BGM of a single consignment based message structure.

Dependency Notes:

Semantic Notes:

Comments:

Notes:	<p>For Customs declarative purposes, each transport document must be identified by an unique identifier, known as Local Reference Number - LRN. This identifier is given by the entity that delivers the declaration, but it has to obey the following format:</p> <ul style="list-style-type: none"><li>- year, 2 digits;</li><li>- EORI, in Portugal means ISO 2 letter country code, plus VAT number with 9 digits;</li><li>- sequential number, 9 digits.</li></ul> <p>When the year changes, the sequence of the sequential number shall be restarted.</p> <p>This is independent of the type of document or other identifiers given to it.</p> <p>This guarantees the uniqueness identification of each document in the set of transport documents that constitute the manifest.</p> <p>Element DE:1490 is of optional usage and it will not be used for uniqueness verification.</p> <p>Example: Document issued by WEC Lines-Ibero Portugal, Lda, in 2022, with the sequence providing number 6842</p> <p>CNI++22PT513980059000006842'</p>
--------	--

Data Element Summary

<b>Segment:</b>	<b>CNT</b> Control Total
<b>Position:</b>	01390
<b>Group:</b>	SG28
<b>Level:</b>	2
<b>Usage:</b>	Conditional (Required)
<b>Max Use:</b>	2
<b>Purpose:</b>	A segment to specify totals for a consignment.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<p>One usage of this segment is to declare the total gross mass of the goods items declared in the transport document, in Kilograms.</p> <p>Although the element 6066 allows 18 digits, only a maximum of 16 digits can be used. In case decimal digits need to be send, then a maximum of 6 are allowed and the amount needed must be discounted from the integer part of the number, in order to keep the maximum of 16 digits. The decimal mark can be the full stop (.) or comma (,) and don't count for the number size according to EDIFACT rules.</p> <p>Another usage is to provide the number of seals present in the consignment. In this case do not use decimal mark since it is a number of objects that is being stated.</p> <p>Example: The goods in this transport document have a total gross weight of 37.500.000,00 Kg</p> <p>CNT+7:37500000,00:KGM'</p> <p>Example: The goods in this transport document have a total gross weight of 37,0068 Kg</p> <p>CNT+7:37,0068:KGM'</p> <p>Example: In the consignment there are ten seals</p> <p>CNT+61:10'</p>

Data Element Summary				
<u>Data Element</u>	<u>Component Element</u>	<u>Name</u>	<u>Base Attributes</u>	<u>User Attributes</u>
<b>C270</b>		<b>CONTROL</b>	<b>M 1</b>	<b>M</b>
		Control total for checking integrity of a message or part of a message.		
	<b>6069</b>	<b>Control total type code qualifier</b>	<b>M an..3</b>	<b>M</b>
		Code qualifying the type of control of hash total.		
		7 Total gross weight		
		Code to indicate total gross weight of a consignment.		
		61 Number of affixed seals		
		To specify the number of seals affixed.		
	<b>6066</b>	<b>Control total quantity</b>	<b>M n..18</b>	<b>M</b>
		To specify the value of a control quantity.		
		If DE:6069 = 7 then this is the value of the total gross weight.		

If DE:6069 = 61 then this is number of seals.				
6411	Measurement unit code	C	an..8	D
Code specifying the unit of measurement.				
Required is element 6069 is 7.				
KGM		Kilogram		

<b>Segment:</b>	<b>FTX</b> Free Text
<b>Position:</b>	01440
<b>Group:</b>	SG28
<b>Level:</b>	2
<b>Usage:</b>	Conditional (Required)
<b>Max Use:</b>	99
<b>Purpose:</b>	A segment to specify free form or processable supplementary information, such as status of transport, remarks to be printed on the transport documents (where required), consignment remarks, insurance instructions, etc., or any other additional information.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<p>This segment is used to provide diverse complementary information related with the transport document. Note that "complementary" does not mean "optional". And "diverse" means that is grouped in categories, each one with defined boundaries.</p> <p>The category being reported in a particular moment is identified by the qualifier in element 4451, and they are:</p> <ul style="list-style-type: none"><li>- Purpose/action being made with the transport document. As explained in the introductory notes of this MIG, the transport documents in a single message can be in different situations; new documents, or existing documents being updated or existing documents being removed. This category is identified by qualifier BAR. This category is required.</li><li>- Justification is to provide text for Customs purposes, mostly on document update or removal. This category is identified by qualifier CUS.</li><li>- Transport contract remarks allow the inclusion of particular conditions expressed in the transport document. This category is identified by qualifier BLR.</li><li>- Additional information is applicable to situations when the declarant pretends to provide other data associated with the transport document in the Customs context. This category is identified by qualifier ACB. One case of this data usage is related with export of goods. Everytime the goods in this segment group are declared in an export customs declaration SG02:GOR:8323=1), it must be stated if they are the total, just a part or the rest of what is referenced on that declaration. This fact is stated in this segment having element C107:4441 with code T for total, P for part and R for rest. However if nothing is declared, the default understanding is that the goods correspond to the total.</li></ul> <p>Each category implies its own segment usage in terms of the elements use, according to the notes in each element.</p> <p>Example: The transport document is new. It is the first time it is mentioned in this manifest.</p> <p>FTX+BAR++9'</p> <p>Example: Additional information related with Article 18 of Union Customs Code, indicating 22PT251533</p>

FTX+ACB++20300+22PT251533'

Example: Justification related with the transport document referring "Relativo ao documento em referência da situação pendente."

FTX+CUS+++Relativo ao documento em referência da situação pendente.'

Example: Goods being exported under this document of transport are part of a Customs declaration

FTX+ACB++P'

**Group:** **LOC** **Segment Group 33: Place/Location Identification**  
**Position:** 01460  
**Group:** Segment Group 28 (Consignment Information)      Conditional (Dependent)  
**Level:** 2  
**Usage:** Conditional (Required)  
**Max Use:** 9  
**Purpose:** A group of segments to specify locations and related date(s)/time(s) which apply to the entire consignment, e.g. place of transshipment.  
**Notes:** This group has four purposes.

One is to identify Customs Offices that have interaction with the movement of the goods under this transport contract. The Customs Clearance Location is required. The other Customs offices depend on the cargo movement or other Customs specific requirements.

Another it is to provide information of the places/ports related with the transport contract. The places of loading and unloading depend on the cargo movement.

Other is to provide information of the terminal/quay/berth where cargo is moved from/to the vessel.

Finally it is to provide information on the warehouse for Customs purposes, like goods verification. Depends on Customs requirements.

Data Element Summary						
Data	Component		Base			User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>			<u>Attributes</u>
3227		LOCATION FUNCTION CODE QUALIFIER	M	1	an..3	M
		Code identifying the function of a location.				
	9	Place of loading				
		[3334] Seaport, airport, freight terminal, rail station or other place at which the goods (cargo) are loaded on to the means of transport being used for their carriage.				
	11	Place of discharge				
		[3392] Seaport, airport, freight terminal, rail station or other place at which goods are unloaded from the means of transport having been used for their carriage.				
	22	Customs clearance location				
		[3080] Place at which Customs clearance should or has taken place.				
	42	Consignment exit customs office location				
		[3097] To identify the customs office at which the goods leave or are intended to leave the customs territory of despatch.				
	76	Original port of loading				
		(3099) The port where the goods were first loaded on a vessel.				
	118	Customs office of departure				
		Customs office at which a Customs transit operation commences (CCC).				

	122	Customs office of destination Customs office where the goods are to be cleared (CCC).			
	164	Berth [3416] Location in port where the vessel is berthed or moored.			
	170	Final port of discharge Last port at which cargo is unloaded from a vessel before the cargo is moved to a place of delivery or destination.			
	281	Bonded warehouse A building or other secured area in which dutiable goods may be stored, manipulated, or undergo manufacturing operations without payment of duty.			
<b>C517</b>	<b>LOCATION IDENTIFICATION</b>		<b>C</b>	<b>1</b>	<b>R</b>
		Identification of a location by code or name.			
	<b>3225</b>	<b>Location identifier</b> To identify a location. If DE:3227 in {22, 42, 118, 122} then the value is Customs Office identifier. If DE:3227=281 then the value is an identifier of a warehouse. Otherwise the value is the UN/Locode or country code according to ISO 3166-1 alpha -2.	<b>C</b>	<b>an..35</b>	<b>R</b>
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
	<b>3055</b>	<b>Code list responsible agency code</b> Code specifying the agency responsible for a code list. Use if DE:3227 in {9, 11, 76, 170}.	<b>C</b>	<b>an..3</b>	<b>D</b>
		5 ISO (International Organization for Standardization) International Organization of Standardization. To use if DE:3225 has a country code.			
		6 UN/ECE (United Nations - Economic Commission for Europe) United Nations Economic Commission for Europe. To use if DE:3225 has an UN/Locode.			
	<b>3224</b>	<b>Location name</b> Name of the location. Must be use if DE:3225 contains a country code.	<b>C</b>	<b>an..256</b>	<b>D</b>
<b>C519</b>	<b>RELATED LOCATION ONE IDENTIFICATION</b>		<b>C</b>	<b>1</b>	<b>D</b>
		Identification the first related location by code or name. Use if DE:3227 in {164, 281}.			
	<b>3223</b>	<b>First related location identifier</b> To identify a first related location. If LOC:3227 = 164 then this element identified the terminal/quay where cargo is being moves from/to the vessel, according to the list provided by the port authority receiving the message. If LOC:3227 = 281 then this element identifies the type or warehouse for Customs purposes according to the present code list.	<b>C</b>	<b>an..35</b>	<b>R</b>
		R Public customs warehouse type I			
		S Public customs warehouse type II			
		T Public customs warehouse type III			

	U	Private customs warehouse			
	V	Storage facilities for the temporary storage of goods			
	Y	Non-customs warehouse			
	Z	Free zone			
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
	<b>3222</b>	<b>First related location name</b>	<b>C</b>	<b>an..70</b>	<b>X</b>
<b>C553</b>		<b>RELATED LOCATION TWO IDENTIFICATION</b>	<b>C</b>	<b>1</b>	<b>X</b>
		Identification of second related location by code or name.			
	<b>3233</b>	<b>Second related location identifier</b>	<b>C</b>	<b>an..35</b>	<b>X</b>
		To identify a second related location.			
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		Code identifying a user or association maintained code list.			
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying the agency responsible for a code list.			
	<b>3232</b>	<b>Second related location name</b>	<b>C</b>	<b>an..70</b>	<b>X</b>
		Name of the second related location.			
<b>5479</b>		<b>RELATION CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>

**Group:** **RFF** **Segment Group 35: Reference**  
**Position:** 01520  
**Group:** Segment Group 28 (Consignment Information)      Conditional (Dependent)  
**Level:** 2  
**Usage:** Conditional (Required)  
**Max Use:** 999  
**Purpose:** A group of segments containing a reference and constants which apply to the entire consignment.  
**Notes:** This group is to provide references of different nature.

One nature is transport document identification provided by the issuer of the document. The applicable qualifiers to use in element RFF:1153 are AAS, AEW, BH, BM, MB, TI, Z05, Z99 and CN (see note below on unfolding process).

Another nature is to provide the identification of the goods shipment under the transport document. In this case means that the identification applies to all goods described in the transport document. The applicable qualifier to use in element RFF:1153 is AVU.

A third nature is about references provided by Customs associated with the document itself or other documents/declarations related with the document. The applicable qualifiers to use in element RFF:1153 are AVX, ABT, AEI.

A fourth nature is to identify authorisations of Customs nature that can be applied to the movement of all goods items in the transport documents. The applicable qualifiers to use in element RFF:1153 are AFB (only in a future time), Z02, Z03, Z04.

A fifth nature is to give special circumstance indication related with Customs context. The applicable qualifier to use in element RFF:1153 is Z01.

Note on the authorizations. The group allows to indicate an authorisation type and identifier that can allow some processing simplification to the transport document and declarations that can be derived from it. Except for regular liner services, authorisations must be supported/proofed by supporting documents. The type and identification of these documents should be present in group 37 (DOC).

Note of the transport documents unfolding process. In this scenario, on referencing the transport document being unfolded, two occurrences of this group must exist to identify the unfolded document. One with the identification of the unfolded document provided by the Shipping Agent/Economic Operator (RFF:1153=CN), the other with the identification of the unfolded document provided by Customs (RFF:1153=AEI).

Note on the special circumstances indication. The occurrence of the group can be used for the economic operator to inform the type of Customs declaration is being pretended to be submitted. This is done by using on of the codes listed in DE:1154. This usage is required.

#### Segment Summary

	<b>Pos.</b>	<b>Seg.</b>		<b>Req.</b>	<b>Max.</b>	<b>Group:</b>
	<b>No.</b>	<b>ID</b>	<b>Name</b>	<b>Des.</b>	<b>Use</b>	<b>Repeat</b>
M	01530	RFF	Reference	M	1	

Segment:	<b>RFF</b> Reference
Position:	01530 (Trigger Segment)
Group:	SG28-SG35
Level:	2
Usage:	Mandatory
Max Use:	1
Purpose:	A segment to express a reference which applies to the entire consignment such as: the document/message number that is to be updated by this very message (according to data element 1225 Message function code in segment BGM), booking reference, order number, insurance contract, etc.

Dependency Notes:

Semantic Notes:

Comments:

Notes:

Example: Document number provided by Customs is  
PTLIS040120221234561234A12345

RFF+ABT:PTLIS040120221234561234A12345'

Example: Main reference number is 22PT123456789012U1

RFF+AVX:22PT123456789012U1'

Example: Bill of Lading number KLTM0752286

RFF+BM:KLTM0752286'

Example: EU Customs authorised issuer status identifier is PT AEOC  
20190121905

RFF+Z04:PT AEOC 20190121905'

Example: Consignments under specific circumstance in the context of exit  
summary declarations

RFF+Z01:A1'

Data Element Summary				
Data	Component		Base	User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
C506		REFERENCE	M 1	M
		Identification of a reference.		
	1153	Reference code qualifier	M an..3	M
		Code qualifying a reference.		
	AAS	Transport contract document identifier		
		[1188] Reference number to identify a document evidencing a transport contract.		
		The value in DE:1154 is the reference to the business transport document.		
		Understood as Multimodal/combined transport document (generic).		
		Corresponds to Customs code N760.		

ABT	<p>Goods declaration document identifier, Customs</p> <p>[1426] Reference number, assigned or accepted by Customs, to identify a goods declaration.</p> <p>The usage of this qualifier means that the value in DE:1154 is a number provided by Customs as a result of the previous creation of the transport document in Customs system.</p> <p>This value must be send when the transport document is being updated or removed (annul).</p>
AEI	<p>Registration number of previous Customs declaration</p> <p>Registration number of the Customs declaration lodged for the previous Customs procedure.</p> <p>This qualifier indicates that the reference is identifying a transport document is being unfolded, using the reference given by Customs when the document was originally submitted.</p> <p>In this case, another occurrence of the RFF segment must exist in the message with qualifier CN in DE:1153.</p>
AEW	<p>Empty container bill number</p> <p>Reference number assigned to an empty container bill, see: 1001 = 708.</p> <p>The value in DE:1154 is the reference to the business transport document.</p> <p>This qualifier is to indicate that the transport document refers to empty transport equipment being transported only for reposition purposes.</p> <p>Corresponds to Customs code N705.</p>
AFB	<p>Cargo manifest number</p> <p>[1037] Reference number assigned to a cargo manifest.</p> <p>This qualifier is a type of Customs authorisation. Only usable in a future date to be defined.</p>
AVU	<p>Unique goods shipment identifier</p> <p>Unique identifier assigned to a shipment of goods linking trade, tracking and transport information.</p> <p>The value in DE:1154 contains a reference given by an interested party to the shipment.</p>
AVX	<p>Movement reference number</p> <p>Number assigned by customs referencing receipt of an Entry Summary Declaration.</p> <p>The value in DE:1154 must be the Main Reference Number (MRN) provided by Customs system on the previous creation of the document. If this reference was provided then it must be present when the transport document is being updated or removed (annul).</p>
BH	<p>House bill of lading number</p> <p>[1039] Reference number assigned to a house bill of lading.</p> <p>The value in DE:1154 is the reference to the business transport document.</p>
BM	<p>Bill of lading number</p>

	Reference number assigned to a bill of lading, see: 1001 = 705. The value in DE:1154 is the reference to the business transport document. Corresponds to Customs code N705.
CN	Carrier's reference number Reference number assigned by carrier to a consignment. This qualifier states that the value in DE:1154 is the identifier provided by the Carrier/Agent of a transport document that is being unfolded. In this case, another occurrence of the RFF segment must exist in the message with qualifier AEI in DE:1153.
MB	Master bill of lading number Reference number assigned to a master bill of lading, see: 1001 = 704. The value in DE:1154 is the reference to the business transport document. Corresponds to Customs code N704.
TI	TIR carnet number Reference number assigned to a TIR carnet. The value in DE:1154 is the reference to the business transport document. Corresponds to Customs code N952.
Z01	EU Customs specific circumstance indicator Use this qualifier when there is the intention to state a specific circumstance, using one value of theodelist in DE:1154.
Z02	EU Customs regular line service request/authorisation This qualifier is a type of Customs authorisation. Corresponds to Customs code C510.
Z03	EU Customs usage of Electronic Transport Document request/authorisation This qualifier is a type of Customs authorisation. Corresponds to Customs code C525.
Z04	EU Customs authorised issuer status request/authorisation This qualifier is a type of Customs authorisation. Corresponds to Customs code C511.
Z05	NATO transit document The value in DE:1154 is the reference to the business transport document. Corresponds to Customs code C624.
Z99	Other uncoded documents The value in DE:1154 is the reference to the business transport document.

Corresponds to Customs code 9Z13.				
<b>1154</b>	<b>Reference identifier</b>	<b>C</b>	<b>an..70</b>	<b>R</b>
	Identifies a reference.			
	When DE:1153=Z01 then the value is from EU NCTS Codelist 296 (CL296).			
	A1	Exit summary declaration		
		Only if DE:1153 = Z01		
	A3	Re-export notification		
		Only if DE:1153 = Z01		
	D3	Electronic transport document (ETD)		
		Only if DE:1153 = Z01		
	E2	Customs goods manifest (CGM)		
		Only if DE:1153 = Z01		
	G4	Temporary storage declaration		
		Only if DE:1153 = Z01		
	G5	Arrival notification in case of movement of goods under temporary storage		
		Only if DE:1153 = Z01		
<b>1156</b>	<b>Document line identifier</b>	<b>C</b>	<b>an..6</b>	<b>X</b>
<b>1056</b>	<b>Version identifier</b>	<b>C</b>	<b>an..9</b>	<b>X</b>
<b>1060</b>	<b>Revision identifier</b>	<b>C</b>	<b>an..6</b>	<b>X</b>

<b>Group:</b>	<b>GOR</b> Segment Group 36: Governmental Requirements
<b>Position:</b>	01550
<b>Group:</b>	Segment Group 28 (Consignment Information) Conditional (Dependent)
<b>Level:</b>	2
<b>Usage:</b>	Conditional (Dependent)
<b>Max Use:</b>	9
<b>Purpose:</b>	A group of segments to identify customs and other governmental procedures and required documents.
<b>Notes:</b>	<p>One usage of this group is related with group 35 (RFF). Its purpose is to provide the type and identification of supporting documents (documents that support the fulfill of a Declaration of Temporary Storage/Document of Transport, SG36:FTX:4451=AVD and SG36:FTX:C108:4440=SD, the reference is in SG37:DOC) or previous documents (when there is an obligation to submit a Summary Entry Declaration for a shipment, the Main Reference number of the Summary Entry Declaration is indicated as previous document of a Declaration of Temporary Storage, SG36:FTX:4451=AVD and SG36:FTX:C108:4440=PD, the reference is in SG37:DOC), exclusively for Customs purposes and regulated by Customs requirements depending on the declarative situations.</p> <p>Note that when a previous document is being referenced, then an identifier to a goods item in that previous document must be given (value in SG36:FTX:C108 first 4440, using SG36:FTX:4451=Z01).</p> <p>Another usage is to provide a declaration type. These declarations depend on the authorisation type that is expressed in the transport document (see SG35 (RFF) notes). The situations of applicability are to identify a Cargo Manifest (SG35:RFF:1153=AFB, only in a future time), to identify a electronic transport document request/authorisation (SG35:RFF:1153=Z03) or to identify an authorised issuer status request/authorisation (SG35:RFF:1153=Z04). Data of these references is to be provided in group 37 (DOC).</p> <p>This group is also used to provide an additional declaration type by using segment FTX (SG36:FTX:4451=CUS) in the group. This is only applicable if the authorisation expressed is of usage of electronic transport document request/authorisation (SG35:RFF:1153=Z03).</p> <p>Other usage is to provide additional references (SG36:FTX:4451=AVD and SG36:FTX:C108:4440=AR, the reference is in SG37:DOC).</p> <p>The GOR segment must be used for syntax purposes only, otherwise it is formally unable the usage of group 37 or segment FTX.</p>

	<b>9417</b>	<b>Government action code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying a type of government action such as inspection, detention, fumigation, security.			
	<b>9353</b>	<b>Government procedure code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying a government procedure.			

**Segment:** **FTX** Free Text  
**Position:** 01600  
**Group:** SG28-SG36  
**Level:** 3  
**Usage:** Conditional (Optional)  
**Max Use:** 3  
**Purpose:** A segment to provide supplementary governmental requirements information for this consignment.

**Dependency Notes:**

**Semantic Notes:**

**Comments:**

**Notes:** This segment is used to signal if the type and identification in SG37:DOC corresponds to a previous document, a supporting document or an additional reference.

It is also used to indicate additional information that can be used for the request for a larger period of validity of EU customs status of the goods.

And it is also used to indicate the identifier of a goods item present in a previous document.

Example: The document identified in the occurrence of this group is a supporting document.

FTX+AVD+++SD'

Example: The document identified in the occurrence of this group is a previous document.

FTX+AVD+++PD'

Example: The additional declaration for a normal customs declaration

FTX+CUS+++A'

Example: The goods item identifier in the previous document is 852

FTX+Z01+++852'

**Data Element Summary**

Data	Component		Base	User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
4451		TEXT SUBJECT CODE QUALIFIER	M 1 an..3	M
		Code qualifying the subject of the text.		
		AVD	Customs Valuation Information	
			Information provided in this category will be used by the trader to make certain declarations in relation to Customs Valuation.	
			When this qualifier is used then the first element 4440 has information about the purpose of the document identified in group 37 (DOC).	
		CUS	Customs declaration information	
			(4034) Note contains customs declaration information.	

		This qualifier states that the first element 4440 is a code expressing an additional declaration type. See the mentioned element for code list.			
Z01		Goods item identifier			
		Use this qualifier to provide the goods item identifier given to a goods item in a previous document.			
4453	FREE TEXT FUNCTION CODE	C	1	an..3	X
C107	TEXT REFERENCE	C	1		X
Coded reference to a standard text and its source.					
4441	Free text description code	M		an..17	X
Code specifying free form text.					
1131	Code list identification code	C		an..17	X
Code identifying a user or association maintained code list.					
3055	Code list responsible agency code	C		an..3	X
Code specifying the agency responsible for a code list.					
C108	TEXT LITERAL	C	1		R
Free text; one to five lines.					
4440	Free text	M		an..512	M
Free form text.					
If DE:4451=CUS then this element contains the Additional Declaration Type.					
If DE:4451=Z01 then this element has the reference number given to a goods item in a previous document. This document is identified in group 37 (DOC) having SG37:DOC:1001=355.					
If DE:4451=AVD then this element clarifies the purpose of the document identified in group 37 (DOC) except when that group refers to a previous document.					
A		For a normal customs declaration (article 162. <sup>o</sup> of the Union Customs Code).			
		This is a type of Additional Declaration.			
AR		Additional Reference			
		The data in SG37:DOC refers an additional reference.			
PD		Previous Document			
		The data in SG37:DOC refers a previous document.			
SD		Supporting Document			
		The data in SG37:DOC refers a supporting document.

Data Element Summary				
Data Element	Component Element	Name	Base Attributes	User Attributes
C002		DOCUMENT/MESSAGE NAME	M 1	M
		Identification of a type of document/message by code or name. Code preferred.		
	1001	Document name code	C an..3	R
		Code specifying the document name.		
	2	Certificate of conformity		
		Certificate certifying the conformity to predefined definitions.		
		Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.		
		Corresponds to Customs code N002.		
	3	Certificate of quality		
		Certificate certifying the quality of goods, services etc.		
		Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.		
		Corresponds to Customs code N003.		
	271	Packing list		
		Document/message specifying the distribution of goods in individual packages (in trade environment the despatch advice message is used for the packing list).		
		Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.		

355	<p>Corresponds to Customs code N271.</p> <p>Customs summary declaration without commercial detail, alternate</p> <p>Alternate Customs declaration summary without any commercial transaction details.</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code N355.</p>
380	<p>Commercial invoice</p> <p>(1334) Document/message claiming payment for goods or services supplied under conditions agreed between seller and buyer.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N380.</p>
578	<p>EU Customs declaration for External Community Transit (T1)</p> <p>Customs declaration for goods under the external Community/common transit procedure. This applies to "non-Community goods" ("T1" under EU legislation and EC- EFTA "Transit Convention").</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG35:RFF:1153=Z03).</p> <p>Corresponds to Customs code T1.</p>
579	<p>EU Customs declaration for internal Community Transit (T2)</p> <p>Customs declaration for goods under the internal Community/common transit procedure. This applies to "Community goods" ("T2" under EU legislation and EC-EFTA "Transit Convention").</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG35:RFF:1153=Z03).</p> <p>Corresponds to Customs code T2.</p>
581	<p>EU Customs declaration for non-fiscal area internal Community Transit (T2F)</p> <p>Declaration for goods under the internal Community transit procedure in the context of trade between the "VAT" territory of EU Member States and EU territories where the VAT rules do not apply, such as Canary islands, some French overseas territories, the Channel islands and the Aaland islands, and between those territories. ("T2F" under EU Legislation).</p> <p>Use this qualifier to state the identified document is related with usage of electronic transport document request/authorization (SG35:RFF:1153=Z03).</p>

	<p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code T2F.</p>
584	<p>EU Document for establishing the Community status of goods (T2L)</p> <p>Form establishing the Community status of goods ("T2L" under EU Legislation).</p> <p>This qualifier states the identified document is related with authorised issuer status request/authorization (SG35:RFF:1153=Z04). It should be used in the import (discharge) manifest as proof of Customs status of goods.</p> <p>Corresponds to Customs code C.</p>
585	<p>EU Document for establishing the Community status of goods for certain fiscal purposes (T2LF)</p> <p>Form establishing the Community status of goods in the context of trade between the "VAT" territory of EU Member States and EU territories where the VAT rules do not apply, such as Canary islands, some French overseas territories, the Channel islands and the Aaland islands, and between those territories ("T2LF" under EU Legislation).</p> <p>This qualifier states the identified document is related with authorised issuer status request/authorization (SG35:RFF:1153=Z04). It should be used in the import (discharge) manifest as proof of Customs status of goods precedent from special fiscal territories.</p> <p>But also can be used to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code F if reference related with authorization.</p> <p>Corresponds to Customs code C620 if identifies a supporting document.</p>
701	<p>Universal (multipurpose) transport document</p> <p>Document/message evidencing a contract of carriage covering the movement of goods by any mode of transport, or combination of modes, for national as well as international transport, under any applicable international convention or national law and under the conditions of carriage of any carrier or transport operator undertaking or arranging the transport referred to in the document.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N701.</p>

820	<p>Despatch note model T</p> <p>European community transit declaration.</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code N820.</p>
821	<p>Despatch note model T1</p> <p>Transit declaration for goods circulating under internal community transit procedures (between European Union (EU) countries).</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code N821.</p>
822	<p>Despatch note model T2</p> <p>Ascertainment that the declared goods were originally produced in an European Union (EU) country.</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code N822.</p>
825	<p>Despatch note model T2L</p> <p>Ascertainment that the declared goods were originally produced in an European Union (EU) country. May only be used for goods that are loaded on one single means of transport in one single departure point for one single delivery point.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N825.</p>
830	<p>Goods declaration for exportation</p> <p>Document/message by which goods are declared for export Customs clearance, conforming to the layout key set out at Appendix I to Annex C.1 concerning outright exportation to the Kyoto convention (CCC). Within a Customs union, "for despatch" may have the same meaning as "for exportation".</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code N830.</p>

851	<p>Phytosanitary certificate</p> <p>A message/document consistent with the model for certificates of the IPPC, attesting that a consignment meets phytosanitary import requirements.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N851.</p>
852	<p>Sanitary certificate</p> <p>Document/message issued by the competent authority in the exporting country evidencing that alimentary and animal products, including dead animals, are fit for human consumption, and giving details, when relevant, of controls undertaken.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N852.</p>
853	<p>Veterinary certificate</p> <p>Document/message issued by the competent authority in the exporting country evidencing that live animals or birds are not infested or infected with disease, and giving details regarding their provenance, and of vaccinations and other treatment to which they have been subjected.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N853.</p>
864	<p>Preference certificate of origin</p> <p>Document/message describing a certificate of origin meeting the requirements for preferential treatment.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N864.</p>
952	<p>TIR carnet</p> <p>International Customs document (International Transit by Road), issued by a guaranteeing association approved by the Customs authorities, under the cover of which goods are carried, in most cases under Customs seal, in road vehicles and/or containers in compliance with the requirements of the Customs TIR Convention of the International Transport of Goods under cover of TIR Carnets (UN/ECE).</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this</p>

	<p>document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N952.</p>
954	<p>EUR 1 certificate of origin</p> <p>Customs certificate used in preferential goods interchanges between EC countries and EC external countries.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N954.</p>
955	<p>ATA carnet</p> <p>International Customs document (Admission Temporaire / Temporary Admission) which, issued under the terms of the ATA Convention (1961), incorporates an internationally valid guarantee and may be used, in lieu of national Customs documents and as security for import duties and taxes, to cover the temporary admission of goods and, where appropriate, the transit of goods. If accepted for controlling the temporary export and reimport of goods, international guarantee does not apply (CCC).</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N955.</p>
977	<p>NATO transit document</p> <p>Customs transit document for the carriage of shipments of the NATO armed forces under Customs supervision.</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code C624.</p>

Z01	<p>EU Customs declaration of goods not subject to a transit regime (C)</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG35:RFF:1153=Z03).</p> <p>Corresponds to Customs code C.</p>
Z02	<p>EU Customs declaration for the applicability of some simplifications to goods under a transit regime (TD)</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG35:RFF:1153=Z03).</p> <p>Corresponds to Customs code TD.</p>
Z03	<p>EU Customs declaration of goods for export to establish a transit regime (X)</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG35:RFF:1153=Z03).</p> <p>Corresponds to Customs code X.</p>
Z05	<p>EU Customs declaration of other goods (N)</p> <p>This qualifier states the identified document is related with authorised issuer status request/authorization (SG35:RFF:1153=Z04).</p> <p>Corresponds to Customs code N.</p>
Z06	<p>Electronic administrative document (e-AD), as referred in article 3, number 1, Regulation (EU) 684/2009</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code C651.</p>
Z07	<p>Accompaniment document of wine and viticulture products</p> <p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code C652.</p>
Z08	<p>Verbal declaration</p>

				<p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code 9D07.</p>
	Z09	Catch certificate		<p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code C673.</p>
	Z10	Application		<p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code 9E22.</p>
	Z11	EU Customs re-export notification		<p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code 4D01.</p>
	Z12	EU Customs re-export notification through SDS/SiMTeM (PT Customs)		<p>Use this qualifier to identify a previous document, considering that SG36:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG36:FTX, first occurrence of FTX:4440, having SG36:FTX:4451=Z01.</p> <p>Corresponds to Customs code 4Y01.</p>
	Z99	Other uncoded documents		<p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG36:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code 9Z13.</p>

**Group:** **TDT** **Segment Group 41: Transport Information**  
**Position:** 01840  
**Group:** Segment Group 28 (Consignment Information) Conditional (Dependent)  
**Level:** 2  
**Usage:** Conditional (Required)  
**Max Use:** 99

**Purpose:** A group of segments to indicate details of the movement of goods such as mode and means of transport, locations, departure, and arrival date(s) and time(s).

**Notes:** One aim of this group is to provide some data on means of transport of the vessel call identified in group 01 (RFF). If the context is importation (SG2:GOR:8323=2) then TDT:8051 must be 3. If the context is exportation (SG2:GOR:8323=1) then TDT:8051 must be 12.

In the context of an import movement type (SG2:GOR:8323=2) then the estimated date of arrival of the goods' to the port, must be provided in DTM segment of this group.

Another usage is to provide information on pre/on carriage mode of transport. If the context is importation then information about on-carriage mode can be provided, stating which mode of transport will be used when goods leave the port. If the context is exportation then information about pre-carriage mode can be provided, stating the mode of transport used when the goods arrived the port.

Complementary to this information, the group has to be used to report the country of origin, countries that were/are part of the route of the consignment, and the country of destination. This data is to be provided in group 43 (LOC) and will be considered by the order of appearance of group 43 (LOC). So, first appearance corresponds to first country of the route, second appearance to second country, and so on. The exception is the country of origin and country of destination since they are identified by specific qualifiers.

It also has to be used to provide data on the usage of cargo in transport equipment or not using group 42 (TSR).

Optionally it can be used to provide data on the method of payment of the transport charges, using group 45 (TCC).

In these last three usages, the TDT segment must be in the message but just for syntax purposes.

**TDT** Transport Information

01850 (Trigger Segment)

SG28-SG41

2

Mandatory

1

A segment to indicate information related to a certain stage of the transport, such as mode, means and carrier.

When DE:8051 = Z01 it means that the relevent data is in groups 42 (TSR), 43 (LOC) and 45 (TCC) in this group. But the TDT segment must be used for syntax purposes only, otherwise it is formally unable to use the other segments according to EDIFACT rules.

Otherwise the segment has data related with the means of transport associated with the vessel call.

Example: Occurrence of group 41 for the purpose of give information on methods of payment of the transport charges

TDT+Z01'

Example: This consignment is on an import movement, by sea, on vessel identified by imo 9365984, with the name WEC VAN EYCK, having Cyprus as nationality.

TDT+3++1+++++9365984:10:155::CY'

Example: Goods arrived the port by road.

TDT+10++3'

Data Element Summary				
Data	Component	Name	Base	User
Element	Element		Attributes	Attributes
8051		TRANSPORT STAGE CODE QUALIFIER	M 1 an..3	M
Code qualifying a specific stage of transport.				
	3	At arrival		
		Transport by which goods are moved to the place of arrival.		
	10	Pre-carriage transport		
		Transport by which the goods are moved prior to their main carriage transport.		
	12	At departure		
		Transport by which goods are moved from the place of departure.		
	30	On-carriage transport		
		Transport by which the goods are moved after the main carriage transport.		
	Z01	Dummy.		
For syntax purposes only. The relevent data is in the other				

				groups/segments in this group. Use only when no data about the vessel identification is present in the occurrence of the group.	
<b>8028</b>	<b>MEANS OF TRANSPORT JOURNEY IDENTIFIER</b>	<b>C</b>	<b>1</b>	<b>an..17</b>	<b>X</b>
<b>C220</b>	<b>MODE OF TRANSPORT</b>	<b>C</b>	<b>1</b>		<b>D</b>
	Method of transport code or name. Code preferred.				
	Use if DE:8051 in {3, 12, 10, 30}.				
<b>8067</b>	<b>Transport mode name code</b>	<b>C</b>		<b>an..3</b>	<b>R</b>
	Code specifying the name of a mode of transport.				
	UN/ECE Recommendation N.º 19 - Codes for Modes of Transport (Doc. Ref. TRADE/CEFACT/2001/19).				
	0				Transport mode not specified
					This mode can only be used when the information provided is provisional at a very early stage of the transport service. If used, it must be corrected later on.
					Use only when DE:8051 in {3,12}.
	1				Maritime Transport
					In this mode is provided at this point of the message structure having DE:8051 in {10,30}, it denotes a transshipment situation.
	2				Rail
					Use only if DE:8051 is {10,30}.
	3				Road
					Use only if DE:8051 is {10,30}.
	4				Air transport
					Use only if DE:8051 is {10,30}.
	5				Mail
					Use only if DE:8051 is {10,30}.
	7				Fixed transport installation
					Use only if DE:8051 is {10,30}.
	8				Inland water transport
					Use only if DE:8051 is {10,30}.
<b>8066</b>	<b>Transport mode name</b>	<b>C</b>		<b>an..17</b>	<b>X</b>
<b>C001</b>	<b>TRANSPORT MEANS</b>	<b>C</b>	<b>1</b>		<b>X</b>
	Code and/or name identifying the type of means of transport.				
<b>8179</b>	<b>Transport means description code</b>	<b>C</b>		<b>an..8</b>	<b>X</b>
	Code specifying the means of transport.				
<b>1131</b>	<b>Code list identification code</b>	<b>C</b>		<b>an..17</b>	<b>X</b>
	Code identifying a user or association maintained code list.				
<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>		<b>an..3</b>	<b>X</b>
	Code specifying the agency responsible for a code list.				
<b>8178</b>	<b>Transport means description</b>	<b>C</b>		<b>an..17</b>	<b>X</b>
	Free form description of the means of transport.				
<b>C040</b>	<b>CARRIER</b>	<b>C</b>	<b>1</b>		<b>X</b>
	Identification of a carrier by code and/or by name. Code preferred.				

	<b>3127</b>	<b>Carrier identifier</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		To identify a carrier.			
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		Code identifying a user or association maintained code list.			
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying the agency responsible for a code list.			
	<b>3126</b>	<b>Carrier name</b>	<b>C</b>	<b>an..35</b>	<b>X</b>
		Name of a carrier.			
<b>8101</b>		<b>TRANSIT DIRECTION INDICATOR CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>
<b>C401</b>		<b>EXCESS TRANSPORTATION INFORMATION</b>	<b>C</b>	<b>1</b>	<b>X</b>
		To provide details of reason for, and responsibility for, use of transportation other than normally utilized.			
	<b>8457</b>	<b>Excess transportation reason code</b>	<b>M</b>	<b>an..3</b>	<b>X</b>
		Code specifying the reason for excess transportation.			
	<b>8459</b>	<b>Excess transportation responsibility code</b>	<b>M</b>	<b>an..3</b>	<b>X</b>
		Code specifying the responsibility for excess transportation.			
	<b>7130</b>	<b>Customer shipment authorisation identifier</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		To identify the authorisation to ship issued by the customer.			
<b>C222</b>		<b>TRANSPORT IDENTIFICATION</b>	<b>C</b>	<b>1</b>	<b>D</b>
		Code and/or name identifying the means of transport.			
		Use if DE:8051 in {3, 12}.			
	<b>8213</b>	<b>Transport means identification name identifier</b>	<b>C</b>	<b>an..35</b>	<b>R</b>
		Identifies the name of the transport means.			
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>R</b>
		Code identifying a user or association maintained code list.			
	10	Vessel IMO number			
	11	Name of the vessel			
	80	European identification number of a riverine vessel (ENI code)			
	81	Name of a riverine vessel			
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>R</b>
		Code specifying the agency responsible for a code list.			
	155	PT, Portuguese Customs			
		Portuguese Customs.			
	<b>8212</b>	<b>Transport means identification name</b>	<b>C</b>	<b>an..70</b>	<b>X</b>
	<b>8453</b>	<b>Transport means nationality code</b>	<b>C</b>	<b>an..3</b>	<b>D</b>
		Code specifying the nationality of a means of transport.			
		If DE:8015 = 12 then ISO 3166 alpha 2 country code. Otherwise not used.			
<b>8281</b>		<b>TRANSPORT MEANS OWNERSHIP INDICATOR CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>
<b>C003</b>		<b>POWER TYPE</b>	<b>C</b>	<b>1</b>	<b>X</b>
		To specify the type of power.			
	<b>7041</b>	<b>Power type code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code indicating the type of power.			
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>

<b>C290</b>		Code identifying a user or association maintained code list.			
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying the agency responsible for a code list.			
	<b>7040</b>	<b>Power type description</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		Description of the type of power.			
		<b>TRANSPORT SERVICE</b>	<b>C</b>	<b>1</b>	<b>X</b>
		To identify a transport service.			
	<b>8462</b>	<b>Transport service identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		Code identifying a transport service.			
	<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
		Code identifying a user or association maintained code list.			
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying the agency responsible for a code list.			
	<b>8463</b>	<b>Transport service name</b>	<b>C</b>	<b>an..35</b>	<b>X</b>
		Name of a transport service.			
	<b>8464</b>	<b>Transport service description</b>	<b>C</b>	<b>an..256</b>	<b>X</b>
		Free form description of a transport service.			

**Segment:** **DTM** Date/Time/Period  
**Position:** 01860  
**Group:** SG28-SG41  
**Level:** 3  
**Usage:** Conditional (Dependent)  
**Max Use:** 1  
**Purpose:** A segment to indicate date(s) and time(s) related to the transport stage.

**Dependency Notes:**

**Semantic Notes:**

**Comments:**

**Notes:** This segment is to provide the ETA at the port of unloading of the consignment. Use if the transport means identified in the this group is the arrival transport to the port where the manifest is being presented (TDT:8051=3).

Regard that timezone to the east of UTC should include the adopted EDIFACT escape character (?) in the value because of the presence of the plus (+) sign. This is also applicable during summer time when daylight saving time shift is applicable.

Note that the date/time shall be adjusted with the timezone offset applied to the system issuing the message (IFCSUM) and not the offset provided by the system that initially recorded the ETA (local time ate the port), regardless it could be the same.

Example: ETA at the port of unloading is 2022/12/21 at 10:32:51, Azores winter time

DTM+777:20221121103251-0100:208'

**Data Element Summary**

<b>Data</b>	<b>Component</b>		<b>Base</b>	<b>User</b>
<b><u>Element</u></b>	<b><u>Element</u></b>	<b><u>Name</u></b>	<b><u>Attributes</u></b>	<b><u>Attributes</u></b>
<b>C507</b>		<b>DATE/TIME/PERIOD</b>	<b>M 1</b>	<b>M</b>
		Date and/or time, or period relevant to the specified date/time/period type.		
	<b>2005</b>	<b>Date or time or period function code qualifier</b>	<b>M an..3</b>	<b>M</b>
		Code qualifying the function of a date, time or period.		
		777 Arrival date/time at initial port with the intent to unload		
		Date/ time that the conveyance arrives at the initial port in the country of destination.		
	<b>2380</b>	<b>Date or time or period text</b>	<b>C an..35</b>	<b>R</b>
		The value of a date, a date and time, a time or of a period in a specified representation.		
	<b>2379</b>	<b>Date or time or period format code</b>	<b>C an..3</b>	<b>R</b>
		Code specifying the representation of a date, time or period.		
		208 CCYYMMDDHHMMSSZHHMM		
		Calendar date including time with seconds, with Time Zone: C = Century, Y = Year; M = Month; D = Day; H = Hour; M = Minute, S = Seconds, Z = leading plus/minus sign, HHMM = difference to UTC in Hours and Minutes.		

<b>Group:</b>	<b>TSR</b> Segment Group 42: Transport Service Requirements
<b>Position:</b>	01870
<b>Group:</b>	Segment Group 41 (Transport Information) Conditional (Required)
<b>Level:</b>	3
<b>Usage:</b>	Conditional (Dependent)
<b>Max Use:</b>	1
<b>Purpose:</b>	A group of segments to specify transport service requirements and scheduling conditions
<b>Notes:</b>	If the consignment is related with cargo in transport equipment or not, it is stated in this group. Required when TDT:8051 is Z01.

Segment Summary

Notes:

Example: Country of origin of the goods is Morocco.  
  
LOC+27+MA::5'  
  
Example: Country of destination of the goods is Norway.  
  
LOC+36+NO::5'  
  
Example: The goods are transhipped in Rotterdam, Netherlands  
  
LOC+92+NL::5'

Data Element Summary					
Data	Component		Base		User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>		<u>Attributes</u>
3227		LOCATION FUNCTION CODE QUALIFIER	M	1 an..3	M
		Code identifying the function of a location.			
	27	Country of origin			
		[3239] To identify the country in which the goods have been produced or manufactured, according to criteria laid down for the application of the Customs tariff or quantitative restrictions, or any measure related to trade.			
	36	Country of ultimate destination			
		(3216) Country known to the consignor or his agent at the time of despatch to be the final country to which the goods are to be delivered.			
	92	Routing			
		Indication of a routing place.			
C517		LOCATION IDENTIFICATION	C	1	R
		Identification of a location by code or name.			
	3225	Location identifier	C	an..35	R
		To identify a location.			
		ISO 3166 Country Code Alpha 2.			
	1131	Code list identification code	C	an..17	X
	3055	Code list responsible agency code	C	an..3	R
		Code specifying the agency responsible for a code list.			
	5	ISO (International Organization for Standardization)			
		International Organization of Standardization.			

	3224	Location name	C	an..256	X
C519		RELATED LOCATION ONE IDENTIFICATION	C	1	X
		Identification the first related location by code or name.			
	3223	First related location identifier	C	an..35	X
		To identify a first related location.			
	1131	Code list identification code	C	an..17	X
		Code identifying a user or association maintained code list.			
	3055	Code list responsible agency code	C	an..3	X
		Code specifying the agency responsible for a code list.			
	3222	First related location name	C	an..70	X
		Name of first related location.			
C553		RELATED LOCATION TWO IDENTIFICATION	C	1	X
		Identification of second related location by code or name.			
	3233	Second related location identifier	C	an..35	X
		To identify a second related location.			
	1131	Code list identification code	C	an..17	X
		Code identifying a user or association maintained code list.			
	3055	Code list responsible agency code	C	an..3	X
		Code specifying the agency responsible for a code list.			
	3232	Second related location name	C	an..70	X
		Name of the second related location.			
5479		RELATION CODE	C	1 an..3	X

		Code identifying a user or association maintained code list.			
	<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
		Code specifying the agency responsible for a code list.			

<b>Group:</b>	<b>NAD</b> Segment Group 47: Name and Address
<b>Position:</b>	02040
<b>Group:</b>	Segment Group 28 (Consignment Information) Conditional (Dependent)
<b>Level:</b>	2
<b>Usage:</b>	Conditional (Required)
<b>Max Use:</b>	99
<b>Purpose:</b>	A group of segments to identify a party, related references, locations contacts, required documents, and charges to be paid by the party.
<b>Notes:</b>	<p>Entities related with the consignment are declared in this group. The scope of entities is larger since several intervenients in the supply chain can be identified, as well entities related with Customs procedures.</p> <p>A particular situation is to identify that an another entity will provide detailed information about the document of transport. This scenario occurs when the document of transport needs to be unfolded (desdoblado). This entity is designated as Nominated Freight Company for this purpose and use code FB in NAD:3035.</p> <p>However there is an exception. One of the occurrences of the group is to identify the location of the place where goods are/will be available for Customs verification. In this case segment LOC must be used.</p> <p>Note that all types of entities declared in this group are related with the consignment and are applicable to all good items.</p> <p>But there is a subset of entities' types that can be different between goods items. If this is not the case, then they should be declared in this group. But if they differ, then they should not appear in this group, and should be declared in group 56 (NAD). This subset of types correspond to qualifiers CS, FW, MF and WH of NAD:3035.</p> <p>Entities classified as payer (NAD:3035 is PR) are the ones that have tariffs to pay to the Port Authority. Only applicable to ports of the Azores Port Authority.</p>

<b>Position:</b>	02050 (Trigger Segment)
<b>Group:</b>	SG28-SG47
<b>Level:</b>	2
<b>Usage:</b>	Mandatory
<b>Max Use:</b>	1
<b>Purpose:</b>	A segment to identify the party's name, address, and function.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	<p>Entities can be identified by two alternative ways.</p> <p>The short form requires only the usage of element C082 to provide entity's EORI number. The long form implies the usage of elements C082 if an identification of the entity was provided by a competent authority of a non-EU country recognized by the EU, C080, C059, 3164, C819, 3251 and 3207 according to the usage attributes.</p> <p>The usage of the short form is required for the entities qualified in DE:3035 by AE, DEN, DT and FB. If an entity of another type has an EORI number, then it is advised the usage of that number and the short form of identification.</p> <p>Example: The declarant of the data in this message is identified by the EORI PT502154368</p> <p>NAD+DT+PT502154368'</p> <p>Example: Location for Customs inspection is Quinta at n. 2, Aveleda Street, 4560 -570 Penafiel, Portugal</p> <p>NAD+EE+++Quinta+Rua da Aveleda::2+PENAFIEL++4560-570+PT'</p> <p>Example: The party to notify is a company identified by the EORI PT516933972</p> <p>NAD+NI+PT516933972:2'</p>

Data Element Summary					
Data	Component		Base		User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>		<u>Attributes</u>
3035		PARTY FUNCTION CODE QUALIFIER	M	1 an..3	M
		Code giving specific meaning to a party.			
	AE	Declarant's agent/representative			
		Any natural or legal person who makes a declaration to an official body on behalf of another natural or legal person, where legally permitted (CCC).			
	AU	Authorized trader (transit)			
		Trader authorized/approved by Customs for special transit procedures e.g. simplified procedure.			
	CN	Consignee			
		[3132] Party to which goods are consigned.			
	CS	Consolidator			
		Party consolidating various consignments, payments etc.			

	CZ	Consignor [3336] Party which, by contract with a carrier, consigns or sends goods with the carrier, or has them conveyed by him. Synonym: shipper, sender.			
	DEN	Agent/representative, direct representation Party authorised to act in the name and on behalf of another person.			
	DT	Declarant [3140] Party which makes a declaration to an official body or - where legally permitted - in whose name, or on whose behalf, a declaration to an official body is made.			
	EE	Location of goods for customs examination before clearance The location where the goods are examined by customs before clearance. This qualifier indicates that data identifies the location of Customs goods inspection.			
	FB	Nominated freight company Party nominated to act as transport company or carrier for the goods. The entity associated with this qualifier will unfold (desdobrar) this document of transport in an independent message, providing further detailed information regarding the cargo, entities and locations.			
	FW	Freight forwarder [3170] Party arranging forwarding of goods.			
	MF	Manufacturer of goods [3513] Party who manufactures the goods.			
	NI	Notify party [3180] Party to be notified. Synonym: Notify party No. 1.			
	PR	Payer [3308] Party responsible for making a payment.			
	WH	Warehouse keeper [3022] Party taking responsibility for goods entered into a warehouse.			
C082	PARTY IDENTIFICATION DETAILS		C	1	D
	Identification of a transaction party by code.				
	Not used when 3035 = EE.				
3039	Party identifier		M	an..35	M
	Code specifying the identity of a party.				
	EORI number of the entity previously issued by a EU Customs Office, or other identification of the entity provided by a competent authority of a non-EU country recognized by the EU.				
	If the entity is of type CN, CZ or NI, and does not have an EORI or other identification provided by a competent authority of a non-EU country recognized by the EU, then this element should have value "VOID".				
1131	Code list identification code		C	an..17	D
	Code identifying a user or association maintained code list.				
	This element is to state if the entity is a natural person, a legal person or an association of persons which is not a legal person but is recognised under Union or				

		national law as having the capacity to perform legal acts.			
		This element is required if DE:3035 in {CN, CZ, NI}.			
		1	Natural person		
		2	Legal person		
		3	Association		
C058	3055	Code list responsible agency code	C	an..3	X
		NAME AND ADDRESS	C	1	X
	Unstructured name and address: one to five lines.				
	3124	Name and address description	M	an..35	X
	Free form description of a name and address line.				
	3124	Name and address description	C	an..35	X
C080		Free form description of a name and address line.			
	3124	Name and address description	C	an..35	X
		Free form description of a name and address line.			
	3124	Name and address description	C	an..35	X
		Free form description of a name and address line.			
	3124	Name and address description	C	an..35	X
C059		Free form description of a name and address line.			
		PARTY NAME	C	1	D
	Identification of a transaction party by name, one to five lines. Party name may be formatted.				
	Not used if DE:C082:3039 contains an EORI number.				
	3036	Party name	M	an..70	M
	Name of a party.				
C059	3036	Party name	C	an..70	X
	3036	Party name	C	an..70	X
	3036	Party name	C	an..70	X
	3036	Party name	C	an..70	X
	3045	Party name format code	C	an..3	X
		STREET	C	1	D
		Street address and/or PO Box number in a structured address: one to four lines.			
		The composite is to provide the address of the entity.			
		Not used if DE:C082:3039 contains an EORI number.			
		Used if DE:3035 = EE and LOC:3233 = Z.			
C059	3042	Street and number or post office box identifier	M	an..256	M
	To identify a street and number and/or Post Office box number.				
	If DE:3035 <> EE the value is the Street Name of the entity.				
	If DE:3035 = EE and LOC:3233 = Z the value is the Street Name of location for Customs control.				
	3042	Street and number or post office box identifier	C	an..256	D
	To identify a street and number and/or Post Office box number.				
		Additional line for the street name.			

					Not used if DE:3035 = EE.
<b>3042</b>	<b>Street and number or post office box identifier</b>	<b>C</b>	<b>an..256</b>	<b>R</b>	To identify a street and number and/or Post Office box number. Door number.
<b>3042</b>	<b>Street and number or post office box identifier</b>	<b>C</b>	<b>an..256</b>	<b>D</b>	To identify a street and number and/or Post Office box number. Postal Office Box.
					Not used if DE:3035 = EE.
<b>3164</b>	<b>CITY NAME</b>	<b>C</b>	<b>1 an..35</b>	<b>D</b>	Name of a city.
					Not used if DE:C082:3039 contains an EORI number.
<b>C819</b>	<b>COUNTRY SUBDIVISION DETAILS</b>	<b>C</b>	<b>1</b>	<b>D</b>	To specify a country subdivision, such as state, canton, county, prefecture.
					Not used if DE:C082:3039 contains an EORI number.
<b>3229</b>	<b>Country subdivision identifier</b>	<b>C</b>	<b>an..9</b>	<b>X</b>	
<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>	
<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>	
<b>3228</b>	<b>Country subdivision name</b>	<b>C</b>	<b>an..70</b>	<b>R</b>	Name of a country subdivision, such as state, canton, county, prefecture.
<b>3251</b>	<b>POSTAL IDENTIFICATION CODE</b>	<b>C</b>	<b>1 an..17</b>	<b>D</b>	Code specifying the postal zone or address.
					Not used if DE:C082:3039 contains an EORI number.
<b>3207</b>	<b>COUNTRY IDENTIFIER</b>	<b>C</b>	<b>1 an..3</b>	<b>D</b>	Identification of the name of the country or other geographical entity as defined in ISO 3166-1 and UN/ECE Recommendation 3.
					Not used if DE:C082:3039 contains an EORI number.

Segment:	<b>LOC</b> Place/Location Identification
Position:	02060
Group:	SG28-SG47
Level:	3
Usage:	Conditional (Dependent)
Max Use:	1
Purpose:	A segment to indicate location where a specific function will be performed.
Dependency Notes:	
Semantic Notes:	
Comments:	
Notes:	Use this segment when SG47:NAD:3035=EE and provides complementary data about the location of Customs inspection.  Example: The designated location is at Freixieiro Customs office  LOC+43+PT000284+A+V'  Example: The deignated location is Temporary Storage Facility in Port of Ponta Delgada  LOC+43+DTP00000644080PT+A+Y'

Data Element Summary				
Data Element	Component Element	Name	Base Attributes	User Attributes
3227		LOCATION FUNCTION CODE QUALIFIER	M 1 an..3	M
		Code identifying the function of a location.		
	43	Place of Customs examination		
		Place where Customs undertakes a physical inspection of goods to satisfy themselves that the goods' nature, origin, condition, quantity and value are in accordance with the particulars furnished on the goods declaration (CCC).		
C517		LOCATION IDENTIFICATION	C 1	D
		Identification of a location by code or name.		
		Use when DE:3233 in {V, Y} to provide an identification number.		
	3225	Location identifier	C an..35	R
		To identify a location.		
	1131	Code list identification code	C an..17	X
	3055	Code list responsible agency code	C an..3	X
	3224	Location name	C an..256	X
C519		RELATED LOCATION ONE IDENTIFICATION	C 1	R
		Identification the first related location by code or name.		
	3223	First related location identifier	C an..35	R
		To identify a first related location.		
	A	Designated location		
	B	Authorised place		
	C	Approved place		
	D	Other		

C553	1131	Code list identification code	C	an..17	X
	3055	Code list responsible agency code	C	an..3	X
	3222	First related location name	C	an..70	X
		RELATED LOCATION TWO IDENTIFICATION	C	1	R
		Identification of second related location by code or name.			
5479	3233	Second related location identifier	C	an..35	R
		To identify a second related location.			
	V	Customs office identifier			
	Y	Authorization number			
		Although the description refers to an authorization number, the value in DE:3225 should be a Temporary Storage Facility number.			
	Z	Address			
	1131	Code list identification code	C	an..17	X
	3055	Code list responsible agency code	C	an..3	X
	3232	Second related location name	C	an..70	X
		RELATION CODE	C	1 an..3	X

**Group:** **CTA** **Segment Group 48: Contact Information**

**Comments:**

**Notes:** This segment is used to provide a textual description of goods in Portuguese or in English. This category is identified by qualifier AAA. It is strongly advisable that goods descriptions follow the "Guidance on acceptable and unacceptable terms for the description of goods", Working document EN v4.10, from DG TAXUD, including future updates. See [https://taxation-customs.ec.europa.eu/customs-4/customs-security/import-control-system-2-ics2-0/import-control-system-2-release-1\\_en](https://taxation-customs.ec.europa.eu/customs-4/customs-security/import-control-system-2-ics2-0/import-control-system-2-release-1_en).

Another usage it to provide shipping marks. This category is identified by qualifier PAC.

It is also used to provide additional information is applicable to situations when the declarant pretends to provide other information associated with the transport document in the Customs context. This category is identified by qualifier ACB.

Additionally everytime the goods in this segment group are declared in an export customs declaration (SG02:GOR:8323=1), it must be stated if they are the total, just a part or the rest of what is referenced on that declaration. This fact is stated in this segment also with qualifier ACB, having element C107:4441 used for this purpose with code T for total, P for part and R for rest. However if nothing is declared, the default understanding it that the goods correspond to the total.

Example: Goods description is PVC bags for packaging purpose, in english.

FTX+AAA+++PVC BAGS FOR PACKAGING PURPOSE'

Example: Shipping marks are RAS/1 12345

FTX+PAC+++RAS/1 12345'

Example: Additional information related with Article 18 of Union Customs Code, indicating 22PT251533

FTX+ACB++20300+22PT251533'

Example: Goods being exported are part of a Customs Declaration of Export

FTX+ACB++P'

Notes:

**NAD**

Name and Address

02560 (Trigger Segment)

SG28-SG55-SG56

3

Mandatory

1

A segment to specify an address of a place of collection or delivery for a goods item.

Entities can be identified by two alternative ways.

The short form requires only the usage of element C082 to provide entity's EORI number. The long form implies the usage of elements C082 if an identification of the entity was provided by a competent authority of a non-EU country recognized by the EU, C080, C059, 3164, C819, 3251 and 3207 according to the usage attributes.

Example: A freight forwarder involved in the movement of the goods item is CARGOBASE TRANSITÁRIOS, LDA identified by the EORI PT509128866

NAD+FW+PT509128866'

Example: The goods items manufacturer is Shandong Sino Carpet Co., Ltd located at No.1 Century Road, Laiwu High-Tech Zone, Jinan City, Shandong Province, China

NAD+MF+++Shandong Sino Carpet Co., Ltd+Century Road:Laiwu High-Tech Zone:1+Jinan City+:::Shandong Province++CN'

Data Element Summary				
Data Element	Component Element	Name	Base Attributes	User Attributes
3035		PARTY FUNCTION CODE QUALIFIER	M 1 an..3	M
		Code giving specific meaning to a party.		
		CS Consolidator		
		Party consolidating various consignments, payments etc.		
		FW Freight forwarder		
		[3170] Party arranging forwarding of goods.		
		MF Manufacturer of goods		
		[3513] Party who manufactures the goods.		
		WH Warehouse keeper		
		[3022] Party taking responsibility for goods entered into a warehouse.		
C082		PARTY IDENTIFICATION DETAILS	C 1	D
		Identification of a transaction party by code.		
	3039	Party identifier	M an..35	M
		Code specifying the identity of a party.		
		EORI number of the entity previously issued by a EU Customs Office, or other identification of the entity provided by a competent authority of a non-EU country		

		recognized by the EU.			
	1131	Code list identification code	C	an..17	X
	3055	Code list responsible agency code	C	an..3	X
C058		NAME AND ADDRESS	C	1	X
		Unstructured name and address: one to five lines.			
	3124	Name and address description	M	an..35	X
		Free form description of a name and address line.			
	3124	Name and address description	C	an..35	X

	3124	Name and address description	C	an..35	X
		Free form description of a name and address line.			
	3124	Name and address description	C	an..35	X
		Free form description of a name and address line.			
C080		PARTY NAME	C	1	D
		Identification of a transaction party by name, one to five lines. Party name may be formatted.			
		Not used if DE:C082:3039 contains an EORI number.			
	3036	Party name	M	an..70	M
		Name of a party.			
	3036	Party name	C	an..70	X
	3036	Party name	C	an..70	X
	3036	Party name	C	an..70	X
	3036	Party name	C	an..70	X
	3045	Party name format code	C	an..3	X
C059		STREET	C	1	D
		Street address and/or PO Box number in a structured address: one to four lines.			
		Not used if DE:C082:3039 contains an EORI number.			
	3042	Street and number or post office box identifier	M	an..256	M
		To identify a street and number and/or Post Office box number.			
		The value is the Street Name of the entity.			
	3042	Street and number or post office box identifier	C	an..256	O
		To identify a street and number and/or Post Office box number.			
		Additional line for the street name.			
	3042	Street and number or post office box identifier	C	an..256	R
		To identify a street and number and/or Post Office box number.			
		Door number.			
	3042	Street and number or post office box identifier	C	an..256	O
		To identify a street and number and/or Post Office box number.			
		Postal Office Box.			
3164		CITY NAME	C	1 an..35	D
		Name of a city.			
		Not used if DE:C082:3039 contains an EORI number.			

<b>C819</b>	<b>COUNTRY SUBDIVISION DETAILS</b>	<b>C</b>	<b>1</b>	<b>D</b>
	To specify a country subdivision, such as state, canton, county, prefecture.			
	Not used if DE:C082:3039 contains an EORI number.			
<b>3229</b>	<b>Country subdivision identifier</b>	<b>C</b>	<b>an..9</b>	<b>X</b>
<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
<b>3228</b>	<b>Country subdivision name</b>	<b>C</b>	<b>an..70</b>	<b>R</b>
	Name of a country subdivision, such as state, canton, county, prefecture.			
<b>3251</b>	<b>POSTAL IDENTIFICATION CODE</b>	<b>C</b>	<b>1 an..17</b>	<b>D</b>
	Code specifying the postal zone or address.			
	Not used if DE:C082:3039 contains an EORI number.			
<b>3207</b>	<b>COUNTRY IDENTIFIER</b>	<b>C</b>	<b>1 an..3</b>	<b>D</b>
	Identification of the name of the country or other geographical entity as defined in ISO 3166-1 and UN/ECE Recommendation 3.			
	Not used if DE:C082:3039 contains an EORI number.			

Segment: **GDS** Nature of Cargo  
Position: 02580  
Group: SG28-SG55  
Level: 3  
Usage: Conditional (Required)  
Max Use: 1  
Purpose: A segment to describe the nature of cargo.

Dependency Notes:

Semantic Notes:

Comments:

Notes: The general description must be given by the Annex II - Eurostat Maritime Transport Directive with two digits.  
  
Example: Solid bulk, agricultural products  
  
GDS+23'

Data Element Summary				
<u>Data</u>	<u>Component</u>	<u>Name</u>	<u>Base</u>	<u>User</u>
<u>Element</u>	<u>Element</u>		<u>Attributes</u>	<u>Attributes</u>
C703		NATURE OF CARGO	C 1	R
		Rough classification of a type of cargo.		
	7085	Cargo type classification code	M an..3	M
		Code specifying the classification of a type of cargo.		
		Annex II - Eurostat Maritime Transport Directive, plus the following codes:		
		101 - Express		
		111 - Mixed (General Cargo/Breakbulk plus Containerised)		
		112 - Mixed (General Cargo/Breakbulk plus Express)		
C288	1131	Code list identification code	C an..17	X
	3055	Code list responsible agency code	C an..3	X
		PRODUCT GROUP	C 1	X
		To give product group information.		
	5389	Product group name code	C an..25	X
		Code specifying the name of a product group.		
	1131	Code list identification code	C an..17	X
		Code identifying a user or association maintained code list.		
	3055	Code list responsible agency code	C an..3	X
		Code specifying the agency responsible for a code list.		
	5388	Product group name	C an..35	X
		Name of a product code.		

**Group:** **MEA** **Segment Group 57: Measurements**  
**Position:** 02590  
**Group:** Segment Group 55 (Goods Item Details)      Conditional (Optional)  
**Level:** 3  
**Usage:** Conditional (Required)  
**Max Use:** 1  
**Purpose:** A group of segments to specify measurements applicable to a goods item.  
**Notes:** This group is only to provide the gross mass of the goods item, including packaging, excluding transport equipment.

Segment Summary						
	Pos.	Seg.		Req.	Max.	Group:
	<u>No.</u>	<u>ID</u>	<u>Name</u>	<u>Des.</u>	<u>Use</u>	<u>Repeat</u>
M	02600	MEA	Measurements	M	1	

Segment:	<b>MEA</b> Measurements
Position:	02600 (Trigger Segment)
Group:	SG28-SG55-SG57
Level:	3
Usage:	Mandatory
Max Use:	1
Purpose:	A segment to specify measurements, other than dimensions, applicable to a goods item.
Dependency Notes:	
Semantic Notes:	
Comments:	
Notes:	Although the element 6314 allows 18 digits, only a maximum of 16 digits can be used. In case decimal digits need to be send, then a maxim of 6 are allowed and the amount needed must be discounted from the integer part of the number, in order to keep the maximum of 16 digits. The decimal mark can be the full stop (.) or comma (,) and don't count for the number size according to EDIFACT rules.  Example: The goods item has a gross weight of 735.000,00 Kg  MEA+AAE+AAB+KGM:735000,00'  Example: The goods item has a gross weight of 21,075 Kg  MEA+AAE+AAB+KGM:21,075'

<b>Comments:</b>	
<b>Notes:</b>	Example: Customs item number provided by Customs is PTLIS040120221234561234A12345  RFF+ABT:PTLIS040120221234561234A12345'

Data Element Summary				
<u>Data Element</u>	<u>Component Element</u>	<u>Name</u>	<u>Base Attributes</u>	<u>User Attributes</u>
C506		REFERENCE	M 1	M
		Identification of a reference.		
	1153	Reference code qualifier	M an..3	M
		Code qualifying a reference.		
		ABT		Goods declaration document identifier, Customs [1426] Reference number, assigned or accepted by Customs, to identify a goods declaration. The usage of this qualifier means that the value in DE:1154 is a number provided by Customs to the goods item as a result of the previous creation of the transport document in Customs system. This value must be send when the transport document is being updated or removed (annul), except if the goods item are being added on the transport document update.
		AFB		Cargo manifest number [1037] Reference number assigned to a cargo manifest. This qualifier is a type of Customs authorisation.
		AFM		Secondary Customs reference A number that identifies the secondary customs reference. The value in DE:1154 gives the identification provided by Customs to the goods item in the transport document of goods item arrival.
		ANK		Reference number assigned by third party Reference number assigned by a third party. The value in DE:1154 gives the identification provided by Customs to the vessel call (known as Contramarca) of the vessel from which the goods item were unloaded.
		AVU		Unique goods shipment identifier Unique identifier assigned to a shipment of goods linking trade, tracking and transport information. Use if not in presence of containerised cargo.

	Z02	EU Customs regular line service request/authorisation This qualifier is a type of Customs authorisation. Corresponds to Customs code C510.		
	Z03	EU Customs usage of Electronic Transport Document request/authorisation This qualifier is a type of Customs authorisation. Corresponds to Customs code C525.		
	Z04	EU Customs authorised issuer status request/authorisation This qualifier is a type of Customs authorisation. Corresponds to Customs code C511.		
1154	Reference identifier	C	an..70	R
	Identifies a reference.			
1156	Document line identifier	C	an..6	X
1056	Version identifier	C	an..9	X
1060	Revision identifier	C	an..6	X

<b>Group:</b>	<b>PCI</b> Segment Group 60: Package Identification

<b>Group:</b>	<b>GOR</b> Segment Group 62: Governmental Requirements
<b>Position:</b>	02790
<b>Group:</b>	Segment Group 55 (Goods Item Details) Conditional (Optional)
<b>Level:</b>	3
<b>Usage:</b>	Conditional (Dependent)
<b>Max Use:</b>	9
<b>Purpose:</b>	A group of segments to identify customs and other governmental procedures and required documents relating to the goods item.
<b>Notes:</b>	<p>One usage of this group is related with group 59 (RFF). Its purpose is to provide the type and identification of supporting documents (documents that support the fulfillment of a Declaration of Temporary Storage/Document of Transport, SG62:FTX:4451=AVD and SG62:FTX:4440=SD, the reference is in SG63:DOC) or previous documents (when there is an obligation to submit a Summary Entry Declaration for a shipment, the Main Reference Number of the Summary Entry Declaration is indicated as previous document of a Declaration of Temporary Storage, SG62:FTX:4451=AVD and SG62:FTX:C108:4440=PD, the reference is in SG63:DOC), exclusively for Customs purposes and regulated by Customs requirements depending on the declarative situations.</p> <p>Note that when a previous document is being referenced, then an identifier to a goods item in the previous document must be given (value in SG62:FTX first 4440, using SG62:FTX:4451=Z01).</p> <p>Another usage is to provide a declaration type. These declarations depend on the authorization type that is expressed in the goods item (see SG59 (RFF) notes). The situations of applicability are to identify a Cargo Manifest (SG59:RFF:1153=AFB, only in a future time), to identify a electronic transport document request/authorization (SG59:RFF:1153=Z03) or to identify a authorized issuer status request/authorization (SG59:RFF:1153=Z04). Data of this references is to be provided in group 63 (DOC)</p> <p>Other usage is to provide additional references (SG62:FTX:4451=AVD and SG62:FTX:4440=AR, the reference is in SG63:DOC).</p> <p>The GOR segment must be used for syntax purposes only, otherwise it is formally unable the usage of group 63 or segment FTX.</p>

## Segment Summary

Segment Group 63: Document/Message Details

02850

Segment Group 62 (Governmental Requirements)      Conditional (Dependent)

4

Conditional (Optional)

1

A group of segments to specify required documents by government for the goods item.

This group is used to provide additional references, identification of supporting documents, the identification of previous documents related with this specific goods item, and the identification of declarations types related with Customs' authorizations.

So it is to used only when SG59:RFF:1153 in {AFB, Z02, Z03, Z04} and SG62:FTX:4451=AVD and SG62:FTX:4440=SD, or SG62:FTX:4451=AVD and SG62:FTX:4440=AR, or SG62:FTX:4451=Z01.

Segment Summary						
	Pos.	Seg.		Req.	Max.	Group:
	<u>No.</u>	<u>ID</u>	<u>Name</u>	<u>Des.</u>	<u>Use</u>	<u>Repeat</u>
M	02860	DOC	Document/Message Details	M	1	

Segment:	<b>DOC</b> Document/Message Details
Position:	02860 (Trigger Segment)
Group:	SG28-SG55-SG62-SG63
Level:	4
Usage:	Mandatory
Max Use:	1
Purpose:	A segment to indicate a document required by government.
Dependency Notes:	
Semantic Notes:	
Comments:	
Notes:	Example: The supporting document is a House Bill of Lading with identifier 985KJH  DOC+714+985KJH'  Example: The declaration type related with the mentioned authorization is a T2F identified by 22ES5216825122636  DOC+581+22ES5216825122636'  Example: The previous document is identified by MLOP5842  DOC+355+MLOP5842'

Data Element Summary				
Data Element	Component Element	Name	Base Attributes	User Attributes
C002		DOCUMENT/MESSAGE NAME	M 1	M
		Identification of a type of document/message by code or name. Code preferred.		
	1001	Document name code	C an..3	R
		Code specifying the document name.		
	2	Certificate of conformity		
		Certificate certifying the conformity to predefined definitions.		
		Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.		
		Corresponds to Customs code N002.		
	3	Certificate of quality		
		Certificate certifying the quality of goods, services etc.		
		Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.		
		Corresponds to Customs code N003.		
	271	Packing list		
		Document/message specifying the distribution of goods in individual packages (in trade environment the despatch advice message is used for the packing list).		
		Use this qualifier to identify a supporting document. To be		

	considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.
355	<p>Corresponds to Customs code N271.</p> <p>Customs summary declaration without commercial detail, alternate</p> <p>Alternate Customs declaration summary without any commercial transaction details.</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p>
380	<p>Corresponds to Customs code N355.</p> <p>Commercial invoice</p> <p>(1334) Document/message claiming payment for goods or services supplied under conditions agreed between seller and buyer.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p>
578	<p>Corresponds to Customs code N380.</p> <p>EU Customs declaration for External Community Transit (T1)</p> <p>Customs declaration for goods under the external Community/common transit procedure. This applies to "non-Community goods" ("T1" under EU legislation and EC- EFTA "Transit Convention").</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG59:RFF:1153=Z03).</p>
579	<p>Corresponds to Customs code T1.</p> <p>EU Customs declaration for internal Community Transit (T2)</p> <p>Customs declaration for goods under the internal Community/common transit procedure. This applies to "Community goods" ("T2" under EU legislation and EC-EFTA "Transit Convention").</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG59:RFF:1153=Z03).</p>
581	<p>Corresponds to Customs code T2.</p> <p>EU Customs declaration for non-fiscal area internal Community Transit (T2F)</p> <p>Declaration for goods under the internal Community transit procedure in the context of trade between the "VAT" territory of EU Member States and EU territories where the VAT rules do not apply, such as Canary islands, some French overseas territories, the Channel islands and the Aaland islands, and between those territories. ("T2F" under EU Legislation).</p>

	<p>Use this qualifier to state the identified document is related with usage of electronic transport document request/authorization (SG59:RFF:1153=Z03).</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Corresponds to Customs code T2F if it is a declaration type.</p> <p>Corresponds to Customs code C612 if it is the type of a previous document.</p>
584	<p>EU Document for establishing the Community status of goods (T2L)</p> <p>Form establishing the Community status of goods ("T2L" under EU Legislation).</p> <p>Use this qualifier to state the identified document is authorised issuer status request/authorization (SG59:RFF:1153=Z04). It should be used in the import (discharge) manifest as proof of Customs status of goods.</p> <p>Corresponds to Customs code C.</p>
585	<p>EU Document for establishing the Community status of goods for certain fiscal purposes (T2LF)</p> <p>Form establishing the Community status of goods in the context of trade between the "VAT" territory of EU Member States and EU territories where the VAT rules do not apply, such as Canary islands, some French overseas territories, the Channel islands and the Aaland islands, and between those territories ("T2LF" under EU Legislation).</p> <p>Use this qualifier to state the identified document is related with authorized issuer status document request/authorization (SG59:RFF:1153=Z04). It should be used in the import (discharge) manifest as proof of Customs status of goods precedent from special fiscal territories.</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Corresponds to Customs code F if it is a declaration type.</p> <p>Corresponds to Customs code C620 if it is the type of a supporting document.</p>
701	<p>Universal (multipurpose) transport document</p> <p>Document/message evidencing a contract of carriage covering the movement of goods by any mode of transport, or combination of modes, for national as well as international transport, under any applicable international convention or national law and under the conditions of carriage of any carrier or transport operator undertaking or arranging the transport referred to in the document.</p>

	<p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N701.</p>
820	<p>Despatch note model T</p> <p>European community transit declaration.</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Corresponds to Customs code N820.</p>
821	<p>Despatch note model T1</p> <p>Transit declaration for goods circulating under internal community transit procedures (between European Union (EU) countries).</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Corresponds to Customs code N821.</p>
822	<p>Despatch note model T2</p> <p>Ascertainment that the declared goods were originally produced in an European Union (EU) country.</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Corresponds to Customs code N822.</p>
825	<p>Despatch note model T2L</p> <p>Ascertainment that the declared goods were originally produced in an European Union (EU) country. May only be used for goods that are loaded on one single means of transport in one single departure point for one single delivery point.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N825.</p>
830	<p>Goods declaration for exportation</p> <p>Document/message by which goods are declared for export Customs clearance, conforming to the layout key set out at Appendix I to Annex C.1 concerning outright exportation to the Kyoto convention (CCC). Within a Customs union, "for despatch" may have the same meaning as "for exportation".</p> <p>Use this qualifier to identify a previous document, considering</p>

	that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.
	Corresponds to Customs code N830.
851	Phytosanitary certificate A message/document consistent with the model for certificates of the IPPC, attesting that a consignment meets phytosanitary import requirements. Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD. Corresponds to Customs code N851.
852	Sanitary certificate Document/message issued by the competent authority in the exporting country evidencing that alimentary and animal products, including dead animals, are fit for human consumption, and giving details, when relevant, of controls undertaken. Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD. Corresponds to Customs code N852.
853	Veterinary certificate Document/message issued by the competent authority in the exporting country evidencing that live animals or birds are not infested or infected with disease, and giving details regarding their provenance, and of vaccinations and other treatment to which they have been subjected. Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD. Corresponds to Customs code N853.
864	Preference certificate of origin Document/message describing a certificate of origin meeting the requirements for preferential treatment. Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD. Corresponds to Customs code N864.
952	TIR carnet International Customs document (International Transit by Road), issued by a guaranteeing association approved by the Customs authorities, under the cover of which goods are carried, in most cases under Customs seal, in road vehicles

	<p>and/or containers in compliance with the requirements of the Customs TIR Convention of the International Transport of Goods under cover of TIR Carnets (UN/ECE).</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N952.</p>
954	<p>EUR 1 certificate of origin</p> <p>Customs certificate used in preferential goods interchanges between EC countries and EC external countries.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N954.</p>
955	<p>ATA carnet</p> <p>International Customs document (Admission Temporaire / Temporary Admission) which, issued under the terms of the ATA Convention (1961), incorporates an internationally valid guarantee and may be used, in lieu of national Customs documents and as security for import duties and taxes, to cover the temporary admission of goods and, where appropriate, the transit of goods. If accepted for controlling the temporary export and reimport of goods, international guarantee does not apply (CCC).</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p> <p>Corresponds to Customs code N955.</p>
977	<p>NATO transit document</p> <p>Customs transit document for the carriage of shipments of the NATO armed forces under Customs supervision.</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p>

	Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.
Z01	<p>Corresponds to Customs code C624.</p> <p>EU Customs declaration of goods not subject to a transit regime (C)</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG59:RFF:1153=Z03).</p>
Z02	<p>Corresponds to Customs code C.</p> <p>EU Customs declaration for the applicability of some simplifications to goods under a transit regime (TD)</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG59:RFF:1153=Z03).</p>
Z03	<p>Corresponds to Customs code TD.</p> <p>EU Customs declaration goods for export to establish a transit regime (X)</p> <p>This qualifier states the identified document is related with usage of electronic transport document request/authorization (SG59:RFF:1153=Z03).</p>
Z05	<p>Corresponds to Customs code X.</p> <p>EU Customs declaration of other goods (N)</p> <p>This qualifier states the identified document is related with authorized issuer status request/authorization (SG59:RFF:1153=Z04).</p>
Z06	<p>Corresponds to Customs code N.</p> <p>Electronic administrative document (e-AD), as referred in article 3, number 1, Regulation (EU) 684/2009</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p>
Z07	<p>Corresponds to Customs code C651.</p> <p>Accompaniment document without commercial detail, alternate</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be</p>

	considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.
Z08	<p>Corresponds to Customs code C652.</p> <p>Verbal declaration</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of FTX:4440, having SG62:FTX:4451=Z01.</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p>
Z09	<p>Corresponds to Customs code 9D07.</p> <p>Catch certificate</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p>
Z10	<p>Corresponds to Customs code C673.</p> <p>Application</p> <p>Use this qualifier to identify a supporting document. To be considered as a supporting document then this must be stated in SG62:FTX with first occurrence of FTX:4440=SD having FTX:4451=AVD.</p>
Z11	<p>Corresponds to Customs code 9E22.</p> <p>EU Customs re-export notification</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of DE:4440, having SG62:FTX:4451=Z01.</p>
Z12	<p>Corresponds to Customs code 4D01.</p> <p>EU Customs re-export notification through SDS/SiMTeM (PT Customs)</p> <p>Use this qualifier to identify a previous document, considering that SG62:FTX first occurrence of FTX:4440=PD and FTX:4451=AVD, related to the goods expressed in this document, identifying the applicable goods in SG62:FTX, first occurrence of DE:4440, having SG62:FTX:4451=Z01.</p>

<b>Group:</b>	<b>SGP</b> Segment Group 66: Split Goods Placement
<b>Position:</b>	02930
<b>Group:</b>	Segment Group 55 (Goods Item Details) Conditional (Optional)
<b>Level:</b>	3
<b>Usage:</b>	Conditional (Dependent)
<b>Max Use:</b>	999
<b>Purpose:</b>	A group of segments to specify the distribution of a goods item among the transport equipment.
<b>Notes:</b>	<p>This group depends of the existence of goods loaded into a transport equipment.</p> <p>This segment group identifies the transport equipment in which goods are loaded. Details on transport equipment are present in the segment group 75 (EQD). Example: a shipper sends 45 metric tons of product XPTO distributed as follows: 20 in equipment A and 25 in equipment B.</p> <p>When displaying the number of volumes/packages it is necessary to have in mind that the total number of volumes/packages of the goods item must equal the sum of the loaded volumes in each equipment.</p> <p>Using this group is based on the knowledge of what goods are in which equipment. Therefore it depends on the knowledge of such information. Thus when using group 66 (SGP), each equipment referenced will also be identified and described in segment group 75 (EQD).</p> <p>For bulk cargo, they are treated as a whole, so they will not be split. This group is not be needed.</p> <p><i>O conteúdo deste grupo deve ser tratado em paralelo e conjuntamente com o grupo 75 para determinar em que ponto das estrutura da MMI os dados são colocados. Ou seja, se são dados que constarão do</i></p> <p><i>Transport Documents : Equipments And Seals : Transport Equipment</i></p> <p><i>ou</i></p> <p><i>Transport Documents : Goods Items : Equipments and Seals : Transport Equipment.</i></p> <p><i>Notar que no caso dos dados serem colocados em Transport Documents : Equipments And Seals : Transport Equipment, há do grupo 66 e do grupo 67 que não serão mapeados. Ver notas respectivas.</i></p>

Notes:

SGP

Split Goods Placement

02940 (Trigger Segment)

SG28-SG55-SG66

3

Mandatory

1

A segment to identify the equipment in which goods are transported.

Example: Container CGTU 200311/5 carries 10 volumes of the goods

SGP+CGTU2003115+10'

Data Element Summary				
Data	Component		Base	User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
C237		EQUIPMENT IDENTIFICATION	M 1	M
		Marks (letters/numbers) identifying equipment.		
	8260	Equipment identifier	C an..17	R
		To identify equipment.		
	1131	Code list identification code	C an..17	X
	3055	Code list responsible agency code	C an..3	X
	3207	Country identifier	C an..3	X
7224		PACKAGE QUANTITY	C 1 n..8	R
		To specify the number of packages.		

Group:	<b>MEA</b> Segment Group 67: Measurements
Position:	02960
Group:	Segment Group 66 (Split Goods Placement) Conditional (Dependent)
Level:	4
Usage:	Conditional (Required)
Max Use:	1
Purpose:	A group of segments to identify measurements.
Notes:	This group in this part of the structure is to provide measurement only of the goods actually loaded in the equipment referenced in SGP segment.

Segment Summary						
	Pos.	Seg.		Req.	Max.	Group:
	<u>No.</u>	<u>ID</u>	<u>Name</u>	<u>Des.</u>	<u>Use</u>	<u>Repeat</u>
M	02970	MEA	Measurements	M	1	

<b>Segment:</b>	<b>MEA</b> Measurements
<b>Position:</b>	02970 (Trigger Segment)
<b>Group:</b>	SG28-SG55-SG66-SG67
<b>Level:</b>	4
<b>Usage:</b>	Mandatory
<b>Max Use:</b>	1
<b>Purpose:</b>	A segment to specify measurements of that portion of the goods item in the equipment.
<b>Dependency Notes:</b>	
<b>Semantic Notes:</b>	
<b>Comments:</b>	
<b>Notes:</b>	Although the element 6314 allows 18 digits, only a maximum of 16 digits can be used. In case decimal digits need to be send, then a maxim of 6 are allowed and the amount needed must be discounted from the integer part of the number, in order to keep the maximum of 16 digits. The decimal mark can be the full stop (.) or comma (,) and don't count for the number size according to EDIFACT rules.  Example: The goods item in the transport equipment has a gross weight of 15.570,00 Kg  MEA+AAE+AAB+KGM:15570,00'

Data Element Summary				
<u>Data Element</u>	<u>Component Element</u>	<u>Name</u>	<u>Base Attributes</u>	<u>User Attributes</u>

C289	TUNNEL RESTRICTION	C	1		X
	To specify a restriction for transport through tunnels.				
8461	Tunnel Restriction Code	C		an..6	X
	A code indicating a restriction for transport through tunnels.				
1131	Code list identification code	C		an..17	X
	Code identifying a user or association maintained code list.				
3055	Code list responsible agency code	C		an..3	X
	Code specifying the agency responsible for a code list.				

**Group:** **EQD** Segment Group 75: Equipment Details  
**Position:** 03260  
**Group:** Segment Group 28 (Consignment Information) Conditional (Dependent)  
**Level:** 2  
**Usage:** Conditional (Optional)  
**Max Use:** 999  
**Purpose:** A group of segments to specify equipment in which goods are transported.  
**Notes:** This group is to describe the transport equipment where goods in the consignment are placed.

Note that if the transport equipment has seals associated to it, they must be declared in the segment SEL in this group. Regard that the sum of the number of different seals in all equipments in the consignment must be equal to the number indicated in SG28:CNT:6066 when element 6069 in that segment has qualifier 61.

O conteúdo deste grupo deve ser tratado em paralelo e conjuntamente com o grupo 66 para determinar em que ponto das estrutura da MMI os dados são colocados. Ou seja, se são dados que constarão do

Transport Documents : Equipments And Seals : Transport Equipment

ou

Transport Documents : Goods Items : Equipments and Seals : Transport Equipment.

Data Element Summary				
Data	Component		Base	User
<u>Element</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
8053		EQUIPMENT TYPE CODE QUALIFIER	M 1 an..3	M
		Code qualifying a type of equipment.		
	CN	Container		
		Equipment item as defined by ISO for transport. It must be of: A) permanent character, strong enough for repeated use; B) designed to facilitate the carriage of goods, by one or more modes of transport, without intermediate reloading; C) fitted with devices for its ready handling, particularly.		
	TE	Trailer		
		A vehicle without motive power, designed for the carriage of cargo and to be towed by a motor vehicle.		

<b>C237</b>	<b>EQUIPMENT IDENTIFICATION</b>	<b>C</b>	<b>1</b>	<b>R</b>
	Marks (letters/numbers) identifying equipment.			
<b>8260</b>	<b>Equipment identifier</b>	<b>C</b>	<b>an..17</b>	<b>O</b>
	To identify equipment.			
<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
<b>3207</b>	<b>Country identifier</b>	<b>C</b>	<b>an..3</b>	<b>X</b>
<b>C224</b>	<b>EQUIPMENT SIZE AND TYPE</b>	<b>C</b>	<b>1</b>	<b>D</b>
	Code and or name identifying size and type of equipment. Code preferred.			
	This composite is used only when the equipment is a container (EQD:8053 = CN).			
<b>8155</b>	<b>Equipment size and type description code</b>	<b>C</b>	<b>an..10</b>	<b>R</b>
	Code specifying the size and type of equipment.			
	In case of ISO container equipment (DE:8053=CN) and if its ISO type is known then send the Size/Type information according to ISO 6346.			
	Otherwise use UN/EDIFACT code list for Data Element 8155.			
<b>1131</b>	<b>Code list identification code</b>	<b>C</b>	<b>an..17</b>	<b>X</b>
<b>3055</b>	<b>Code list responsible agency code</b>	<b>C</b>	<b>an..3</b>	<b>R</b>
	Code specifying the agency responsible for a code list.			
	5 ISO (International Organization for Standardization)			
	International Organization of Standardization.			
	Use this code when DE:8155 contains the ISO 6346 code.			
	6 UN/ECE (United Nations - Economic Commission for Europe)			
	United Nations Economic Commission for Europe.			
	Use this code when DE:8155 contains a code from the list associated with the Data Element.			
<b>8154</b>	<b>Equipment size and type description</b>	<b>C</b>	<b>an..35</b>	<b>X</b>
<b>8077</b>	<b>EQUIPMENT SUPPLIER CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>
<b>8249</b>	<b>EQUIPMENT STATUS CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>
<b>8169</b>	<b>FULL OR EMPTY INDICATOR CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>R</b>
	Code indicating whether an object is full or empty.			
	4 Empty			
	Indicates that the object is empty.			
	5 Full			
	Indicates that the object is full.			
<b>4233</b>	<b>MARKING INSTRUCTIONS CODE</b>	<b>C</b>	<b>1 an..3</b>	<b>X</b>

Segment:	<b>MEA</b> Measurements
Position:	03300
Group:	SG28-SG75
Level:	3
Usage:	Conditional (Required)
Max Use:	1
Purpose:	A segment to specify measurements, other than dimensions, associated with the equipment, such as weight.
Dependency Notes:	
Semantic Notes:	
Comments:	
Notes:	Although the element 6314 allows 18 digits, only a maximum of 16 digits can be used. In case decimal digits need to be send, then a maxim of 6 are allowed and the amount needed must be discounted from the integer part of the number, in order to keep the maximum of 16 digits. The decimal mark can be the full stop (.) or comma (,) and don't count for the number size according to EDIFACT rules.  Example: Container with tare 2139 Kg  MEA+WT+T+KGM:2139'
